Art in Genoa, 1600-1750 - Jonathan Bober 2020-04-28

Genoa completed its transformation from a faded maritime power into a thriving banking center for Europe in the seventeenth century. The wealth accumulated by its leading families spurred investment in the visual arts on an enormous scale. This volume explores how artists both foreign and native created a singularly rich and extravagant expression of the baroque in works of extraordinary variety, sumptuousness, and exuberance. This art, however, has remained largely hidden behind the facades of the city's palaces, with few works, apart from those by the school's great expatriates, found beyond its borders. As a result, the Genoese baroque has been insufficiently considered or appreciated. Lavishly illustrated, 'A Superb Baroque' is comprehensive, encompassing all the major media and participants. Presented are some 140 select works by the celebrated foreigners drawn to the city and its flourishing

environment. Offering three levels of exploration-essays that frame and interpret, section introductions that characterize principal currents and stages, and texts that elucidate individual works-this volume is by far the most extensive study of the Genoese baroque in the English language.00Exhibition: National Gallery of Art, Washington, DC, USA (03.05.-16.08.2020) / Scuderie del Quirinale, Rome, Italy (03.10.2020 - 10.01.2021).

Expanding the Knowledge Economy - Paul M. Cunningham 2007

The Third Industrial Revolution - Jeremy Rifkin 2011-10-04

The Industrial Revolution, powered by oil and other fossil fuels, is spiraling into a dangerous endgame. The price of gas and food are climbing, unemployment remains high, the housing market has tanked, consumer and government debt is soaring, and the recovery is slowing. Facing the prospect of a second collapse of the global economy, humanity is desperate for a sustainable economic game plan to take us into the future. Here, Jeremy Rifkin explores how Internet technology and renewable energy are merging to create a powerful "Third Industrial Revolution." He asks us to imagine hundreds of millions of people producing their own green energy in their homes, offices, and factories, and sharing it with each other in an "energy internet," just like we now create and share information online. Rifkin describes how the five-pillars of the Third Industrial Revolution will create thousands of businesses, millions of jobs, and usher in a fundamental reordering of human relationships, from hierarchical to lateral power, that will impact the way we conduct commerce, govern society, educate our children, and engage in civic life. Rifkin's vision is already gaining traction in the international community. The European Union Parliament has issued a formal declaration calling for its implementation, and other nations in Asia, Africa, and the Americas, are quickly preparing their own initiatives for transitioning into the new economic paradigm. The Third Industrial Revolution is an insider's account of the next great economic era, including a look into the personalities and players — heads of state, global CEOs, social entrepreneurs, and NGOs — who are pioneering its implementation around the world.

The Dance of Anger - Harriet Lerner 2014-03-25
The renowned classic and New York Times bestseller that has transformed the lives of millions of readers, dramatically changing how women and men view relationships. Anger is something we feel. It exists for a reason and always deserves our respect and attention. We all have a right to everything we feel—and certainly our anger is no exception. "Anger is a signal and one worth listening to," writes Dr. Harriet Lerner in her renowned classic that has transformed the lives of millions of readers. While anger deserves our attention and respect, women still learn to silence our anger, to deny it entirely, or to vent it in a way that leaves us feeling helpless and powerless. In this engaging and eminently wise book, Dr. Lerner teaches both women and men to identify the true sources of anger and to use it as a powerful vehicle for creating lasting change. For decades, this book has helped millions of readers learn how to turn their anger into a constructive force for reshaping their lives. With a new introduction by the author, *The Dance of Anger* is ready to lead the next generation.

The Primacy of Drawing - Deanna Petherbridge 2010

Drawing has always been an inseparable part of Western art-making, but its role has been subjected to increasing scrutiny during the past decades. Admiration for found objects and readymades, the endless possibilities of new technologies, and the embodiment of the artist as performer and animator of social practices as well as maker of artefacts mean that drawing practice has shifted away from the traditional life-class study, portrait likeness or town- and landscape sketch. This book is the first of its kind to address emergent ways of drawing within a richly illustrated trans-historical context and to propose ways of looking and constructions of meanings around a huge range of practices, both old and new. It celebrates Leonardo, Michelangelo, Anguissola, Durer, Rubens, Rembrandt, Goya, Fuseli, Kauffman, Ingres, Menzel, Seurat, Van Gogh, Picasso,

Matisse, Bourgeois, Trockel, but it also illustrates, analyses and proposes ways to approach the drawings of many less-familiar artists and the ideas and theories that inform their work. --

Handbook of Research on Emerging Digital Tools for Architectural Surveying, Modeling, and Representation - Brusaporci, Stefano 2015-07-13

Technological revolutions have changed the field of architecture exponentially. The advent of new technologies and digital tools will continue to advance the work of architects globally, aiding in architectural design, planning, implementation, and restoration. The Handbook of Research on Emerging Digital Tools for Architectural Surveying, Modeling, and Representation presents expansive coverage on the latest trends and digital solutions being applied to architectural heritage. Spanning two volumes of research-based content, this publication is an all-encompassing reference source for scholars, IT professionals, engineers, architects, and business managers interested in current methodologies, concepts, and instruments being used in the field of architecture.

Beyond the God Particle - Leon M. Lederman 2013

The physicist authors of Quantum Physics for Poets discuss the importance of the Higgs Boson in 2012 and the future of particle physics, explaining the forces and laws surrounding the "God Particle" and the ways the United States can recapture a leadership role in scientific advancement.

Precalculus - Jay P. Abramson 2014-10-23

"Precalculus is intended for college-level precalculus students. Since precalculus courses vary from one institution to the next, we have attempted to meet the needs of as broad an audience as possible, including all of the content that might be covered in any particular course. The result is a comprehensive book that covers more ground than an instructor could likely cover in a typical one- or two-semester course; but instructors should find, almost without fail, that the topics they wish to include in their syllabus are covered in the text. Many chapters of OpenStax College Precalculus are suitable for other freshman and sophomore math courses such as College Algebra and Trigonometry; however, instructors of those courses might need to supplement or adjust the material. OpenStax will also be releasing College Algebra and Algebra and trigonometry titles tailored to the particular scope, sequence, and pedagogy of those courses."--Preface.

A European Public Investment Outlook - Floriana Cerniglia 2020-06-12

This outlook provides a focused assessment of the state of public capital in the major European countries and identifies areas where public investment could contribute more to stable and sustainable growth. A European Public Investment Outlook brings together contributions from a range of international authors from diverse intellectual and professional backgrounds, providing a valuable resource for the policy-making community in Europe to feed their discussion on public investment. The volume both offers sector-specific advice and highlights larger areas which should be prioritized in the policy debate (from transport to social capital, R&D and the

environment). The Outlook is structured into two parts: the chapters of Part I respectively explore public investment trends in France, Germany, Italy, Spain and Europe as a whole, and illuminate how the legacy of the 2008 Global Financial Crisis is one of insufficient public investment. Part II investigates some areas into which resources could be channelled to reverse the recent trend and provide European economies with an adequate public capital stock. The essays in this outlook collectively foster a broad approach to and definition of public investment, that is today more relevant than ever. Offering up a timely and clear case for the elimination of bias against investment in European fiscal rules, this outlook is a welcome contribution to the European debate, aimed both at policy makers and general readers.

Sendebare - Pietro Taravacci 2003

Digital Marketing Excellence - Dave Chaffey
2017-03-31

Now in its fifth edition, the hugely popular *Digital Marketing Excellence: Planning, Optimizing and Integrating Online Marketing* is fully updated, keeping you in line with the changes in this dynamic and exciting field and helping you create effective and up-to-date customer-centric digital marketing plans. A practical guide to creating and executing digital marketing plans, it combines established approaches to marketing planning with the creative use of new digital models and digital tools. It is designed to support both marketers and digital marketers, and students of business or marketing who want a thorough yet practical grounding in digital marketing. Written by two highly experienced digital marketing consultants, the book shows you how to: Draw up an outline digital marketing plan Evaluate and apply digital marketing principles and models Integrate online and offline communications Implement customer-driven digital marketing Reduce costly trial and error Measure and enhance your digital marketing Learn best practices for reaching and engaging your audiences using the key digital marketing platforms like Apple, Facebook, Google and Twitter. This new edition seamlessly integrates the latest changes in social media technology, including expanded coverage of mobile

technology, demonstrating how these new ways to reach customers can be integrated into your marketing plans. It also includes new sections on data analytics, clearly demonstrating how marketers can leverage data to their advantage. Offering a highly structured and accessible guide to a critical and far-reaching subject, *Digital Marketing Excellence, Fifth Edition*, provides a vital reference point for all students and managers involved in marketing strategy and implementation.

Blaze Your Own Trail - Rebekah Bastian
2020-02-11

A modern, feminist take on the classic choose-your-own-journey book, inspiring readers to embrace the fact that the only right path is the one they forge. 2021 Independent Publisher Book Award Gold Medal Winner in the Self Help Category So many women enter their adult lives believing that they should know where they are going and how to get there. This can make life decisions feel intimidating and overwhelming. While some choices that lie ahead are fairly predictable, such as those surrounding career, partnership, and motherhood, the effects of these choices can lead to more complicated and unexpected turns that are seldom discussed. Rather than suggesting a rule book, Rebekah Bastian, vice president at Zillow and recognized thought leader, inspires you to *Blaze Your Own Trail*. "I have the benefit of being a living example of crooked paths, magnificent screw-ups, and shocking successes," she writes. Through storylines and supportive data that explore workplace sexism, career changes, marriage, child-rearing, existential crises, and everything in between, you will learn to embrace and feel less alone in your own nonlinear journey. Even better, you can turn back decisions and make different ones. *Blaze Your Own Trail* includes nineteen possible outcomes and many routes to get there. You will find that you have the strength to make it through any of them. "Outstanding . . . She gears her book towards exploring female experience and allows readers the opportunity to choose a variety of paths at the end of each chapter. In essence, this

is the chronicle of finding your way through adult life and all its attendant joys and challenges.” —Hollywood Digest

The People of the Wind - Poul Anderson
2011-09-29

Like two giants the old enemies faced each other across the reaches of the galaxy - the Terran Empire and the Ythrian Domain. Terra was a Leviathan, encroaching ever further among the stars, promising peace and prosperity - but at the price of freedom. Ythri was smaller, but an empire in its own right, peopled by birdlike beings with a civilisation and intellect that easily matched Terra's own. And between the adversaries lay Avalon. One single planet, inhabited by human and Ythri alike. Both sides wanted to claim Avalon, by persuasion or by force, for it was a key world that could turn the tide of the war. But Avalon had developed a unique culture, a powerful blend of human and Ythrian thought. And Avalon had ideas of its own....

Live Electronic Music - Friedemann Sallis
2017-11-20

During the twentieth century, electronic technology enabled the explosive development of new tools for the production, performance, dissemination and conservation of music. The era of the mechanical reproduction of music has, rather ironically, opened up new perspectives, which have contributed to the revitalisation of the performer's role and the concept of music as performance. This book examines questions related to music that cannot be set in conventional notation, reporting and reflecting on current research and creative practice primarily in live electronic music. It studies compositions for which the musical text is problematic, that is, non-existent, incomplete, insufficiently precise or transmitted in a nontraditional format. Thus, at the core of this project is an absence. The objects of study lack a

reliably precise graphical representation of the work as the composer or the composer/performer conceived or imagined it. How do we compose, perform and study music that cannot be set in conventional notation? The authors of this book examine this problem from the complementary perspectives of the composer, the performer, the musical assistant, the audio engineer, the computer scientist and the musicologist.

Purple Cow - Seth Godin 2005-01-27

You're either a Purple Cow or you're not. You're either remarkable or invisible. Make your choice. What do Apple, Starbucks, Dyson and Pret a Manger have in common? How do they achieve spectacular growth, leaving behind former tried-and-true brands to gasp their last? The old checklist of P's used by marketers - Pricing, Promotion, Publicity - aren't working anymore. The golden age of advertising is over. It's time to add a new P - the Purple Cow. Purple Cow describes something phenomenal, something counterintuitive and exciting and flat-out unbelievable. In his new bestseller, Seth Godin urges you to put a Purple Cow into everything you build, and everything you do, to create something truly noticeable. It's a manifesto for anyone who wants to help create products and services that are worth marketing in the first place.

Climate Change and Cities - Cynthia Rosenzweig 2018-03-29

The Urban Climate Change Research Network's Second Assessment Report on Climate Change in Cities (ARC3.2) is the second in a series of global, science-based reports to examine climate risk, adaptation, and mitigation efforts in cities. The book explicitly seeks to explore the implications of changing climatic conditions on critical urban physical and social infrastructure sectors and intersectoral concerns. The primary purpose of ARC3.2 is to inform the development and implementation of effective urban climate change policies, leveraging ongoing and planned investments for populations in cities of developing, emerging, and developed countries. This volume, like its predecessor, will be invaluable for a range of audiences involved with

climate change and cities: mayors, city officials and policymakers; urban planners; policymakers charged with developing climate change mitigation and adaptation programs; and a broad spectrum of researchers and advanced

students in the environmental sciences.
