Himalayan Biodiversity in the Changing World - Pavel Kindlmann 2011-09-18

This book presents some results on selected taxa in the Himalayan region (mainly Nepal), pinpoints the threats to their survival and suggests ways how to avoid their extinction. Most chapters are based on graduate research projects - relatively long-term field studies. The data presented here can be a good source of updated information on the subject and will prove to be a very useful reference in future studies of Himalayan biodiversity. They also tend to pinpoint the existing gaps in our knowledge of this region. All the chapters are based on recent trends of biodiversity and conservation vision, so the book can be a potential alternative to the existing relatively older books with outdated vision and information. Its main goal, however, is to disseminate the information about biodiversity conservation problems in the Himalayan region among the people in the developed world.

Light on the Landscape - William Neill 2020-07

See the images and read the stories behind the creative process of one of America's most respected landscape photographers, William Neill. For more than two decades, William Neill has been offering his thoughts and insights about photography and the beauty of nature in essays that cover the techniques, business, and spirit of his photographic life. Curated and collected here for the first time, and accompanying 128 beautiful reproductions of Neill's photographs, these essays are both pragmatic and profound, offering readers an intimate look behind the scenes at Neill's creative process behind individual photographs as well as a discussion of the larger and more foundational topics that are key to his philosophy and approach to work. Drawing from the tradition of behind-the-scenes books like Ansel Adams' *Examples: The Making of 40 Photographs* and Galen Rowell's *Mountain Light: In Search of the Dynamic Landscape*, *Light on the Landscape* covers in detail the core photographic fundamentals such as light, composition, camera angle, and exposure choices, but it also deftly considers those subjects that are less frequently examined: portfolio development, marketing, printmaking, nature stewardship, inspiration, preparation, self-improvement, and more. The result is a profound and wide-ranging exploration of that magical convergence of light, land, and camera. Filled with beautiful and inspiring photographs, *Light on the Landscape* is also full of the kind of wisdom that only comes from a deeply thoughtful photographer who has spent a lifetime communicating with a camera. Incorporating the lessons within the book, you too can learn to achieve not only technically

excellent and beautiful images, but photographs that truly rise above your best and reveal your deeply personal and creative perspective--your vision, your voice.

WTF, Evolution?! - Mara Grunbaum 2014-10-07

We all have our off days. Why should Evolution be any different? Maybe Evolution got carried away with an idea that was just a little too

crazy—like having the Regal Horned Lizard defend itself by shooting three-foot streams of blood from its eyes. Or maybe Evolution ran out of steam (Memo to Evolution: The Irrawaddy Dolphin looks like a prototype that should have been left on the drawing board). Or maybe Evolution was feeling cheeky—a fish with hands? Joke’s on you, Red Handfish! Or maybe Evolution simply goofed up: How else to explain the overgrown teeth of the babirusas that curl backward over their face? Oops. Mara Grunbaum is a very smart, very funny science writer who celebrates the best—or, really, the worst—of Evolution’s blunders. Here are more than 100 outlandish mammals, reptiles, insects, fish, birds, and other creatures whose very existence leaves us shaking our heads and muttering WTF?! Ms. Grunbaum’s especially brilliant stroke is to personify Evolution as a well-meaning but somewhat oblivious experimenter whose conversations with a skeptical narrator are hilarious. For almost 4 billion years, Evolution has produced a nonstop parade of inflatable noses, bizarre genitalia, and seriously awkward necks. What a comedian!

Finding a Million-Star Hotel - Bob Mizon
2016-07-15

Bob Mizon, one of the world's best known campaigners against the veil of light pollution that has taken away the starry sky from most of the world's population, takes readers to a hundred places in the UK and the USA where the wonders of the night sky might still be enjoyed in perfect or near-perfect night skies. Visiting small hotels and simple campsites, and savoring vast dark-sky reserves where the night sky is actively protected, The Million-Star Hotel celebrates the black skies of yesteryear - which may become a reality for more and more of us as modern technology reins in lighting and puts it only where needed. How can you prepare for your stay beneath the stars? What astronomy can you do during the daytime? What kind of equipment will you need? Questions such as these are answered, and if town dwellers return inspired - and, Bob hopes, also inspired to look with fresh eyes at their own local lighting - there is enough information here for them to equip themselves for some urban astronomy too.

Acknowledgments - Becky Lucas 2021-06-01

From critically acclaimed comedian Becky Lucas comes a funny, consoling and very candid collection of stories and essays about friends, enemies and figuring it out that establishes her as one of today's most original comedy writers. There's no such thing as a perfect life, but there are perfectly hilarious moments. The best stories are often about the lowest points in our lives - the soul-crushing jobs, the bad boyfriends, the terrible holidays, the betrayals and heartbreaks. These are the stories I tell people to make them like me, but, more importantly, they've helped me learn how to like myself. So this book is a collection of thank-yous and acknowledgments: * Thank you to an ex-lover who marvelled at the fact he could get hard with me, even though I wasn't up to his usual standard. * Thank you to the coked-up real estate agent who, while lecturing me and my friend about the importance of travelling, fell down a flight of stairs. * Thank you to the woman who approached me after a gig and told me she hoped her daughter wouldn't end up like me. You've all taught me that you can't control who comes into your life or what happens to you, but you can decide just what it is you take from them.
