## **The Flavors of Modernity** - Gian-Paolo Biasin 2017-03-14

From Rabelais's celebration of wine to Proust's madeleine and Virginia Woolf's boeuf en daube in *To the Lighthouse*, food has figured prominently in world literature. But perhaps nowhere has it played such a vital role as in the Italian novel. In a book flowing with descriptions of recipes, ingredients, fragrances, country gardens, kitchens, dinner etiquette, and even hunger, Gian-Paolo Biasin examines food images in the modern Italian novel so as to unravel their

function and meaning. As a sign for cultural values and social and economic relationships, food becomes a key to appreciating the textual richness of works such as Lampedusa's *The Leopard*, Manzoni's *The Betrothed*, Primo Levi's *Survival in Auschwitz*, and Calvino's *Under the Jaguar Sun*. The importance of the culinary sign in fiction, argues Biasin, is that it embodies the oral relationship between food and language while creating a sense of materiality. Food contributes powerfully to the reality of a text by making a fictional setting seem credible and coherent: a Lombard peasant eats polenta in *The Betrothed*, whereas a Sicilian prince offers a monumental macaroni timbale at a dinner in *The Leopard*. Similarly, Biasin shows how food is used by writers to connote the psychological traits of a character, to construct a story by making the protagonists meet during a meal, and even to call attention to the fictionality of the story with a metanarrative description. Drawing from anthropology, psychoanalysis,

sociology, science, and philosophy, the author gives special attention to the metaphoric and symbolic meanings of food. Throughout he blends material culture with observations on thematics and narrativity to enlighten the reader who enjoys the pleasures of the text as much as those of the palate. **Pan'ino, the (reduced Price)** - Maria Teresa  
Marco 2021-06-10

- Ninety-four delicious recipes for Italy's answer  
to fast food - Chef Alessandro Frassica  
emphasizes the use of fresh ingredients in  
imaginative combinations What could be more  
simple than a pan'ino? Take some bread and  
butter, slice it through the middle and fill it.  
Seen in this way, the sandwich is almost an  
"anti-cuisine", a nomadic shortcut that allows for  
speed and little thought. But when Alessandro  
Frassica thinks about his pan'ino, he considers it  
in a different way, not as a shortcut, but as an

instrument for telling stories, creating layers of tales right there between the bread and its butter. Because even if the sandwich is simple, it is not necessarily so easy to create. Alessandro searches for ingredients, and in the raw foods he finds people: producers of pecorino cheese from Benevento, anchovies from Cetara, 'nduja spicy salami from Calabria. Then he studies the combinations, the consistencies and the temperature, because a pan'ino is not just a random object; savoury must be complemented by sweet; tapenade softens and provides moisture; bread should be warmed but not dried; thus the sandwich becomes a simple way of saying many excellent things, including finding a complexity of flavours that can thrill in just one bite.

**Pasta and Pizza** - Franco La Cecla 2007

Pasta and pizza, in all their infinitely delicious and universally appealing varieties, are inextricably connected to Italian identity. These familiar foods not only represent Italy's culinary traditions, according to anthropologist Franco La Cecla, they have unified the Italian people and spread Italian culture worldwide. Pasta and Pizza tells the story of how cuisine born in the south of Italy during the Arab conquest became a foundation for the creation of a new nation. As La Cecla shows, this process intensified as millions of Italians immigrated to the Americas: it was abroad that pasta and pizza became synonymous with being Italian, and the foods' popularity grew as the Italian presence expanded in American culture. More than literature, art, or even language, food serves as a strong cultural rallying point for the Italian people and a way to disseminate Italian traditions worldwide. Available for the first time

in English translation, La Cecla's lively and accessible study will be of interest to a wide range of readers, from social theorists to avid foodies.

**Istanbul Istanbul** - Burhan Sönmez 2016-05-05

"Istanbul, Istanbul turns on the tension between the confines of a prison cell and the vastness of the imagination; between the vulnerable borders of the body and the unassailable depths of the mind. This is a harrowing, riveting novel, as unforgettable as it is inescapable." —Dale Peck, author of Visions and Revisions "A wrenching love poem to Istanbul told between torture sessions by four prisoners in their cell beneath the city. An ode to pain in which Dostoevsky meets The Decameron." —John Ralston Saul, author of On Equilibrium; former president, PEN

International “Istanbul is a city of a million cells, and every cell is an Istanbul unto itself.” Below the ancient streets of Istanbul, four prisoners—Demirtay the student, the doctor, Kamo the barber, and Uncle Küheylan—sit, awaiting their turn at the hands of their wardens. When they are not subject to unimaginable violence, the condemned tell one another stories about the city, shaded with love and humor, to pass the time. Quiet laughter is the prisoners’ balm, delivered through parables and riddles. Gradually, the underground narrative turns into a narrative of the above-ground. Initially centered around people, the book comes to focus on the city itself. And we discover there is as much suffering and hope in the Istanbul above ground as there is in the cells underground. Despite its apparently bleak setting, this novel—translated into seventeen languages—is about creation, compassion, and the ultimate triumph of the imagination.

**Biodiversity of Vegetable Crops, A Living Heritage** - Massimiliano Renna 2019-04-09

Intensive agriculture has generally resulted in higher productivity, but also in a trend towards decreasing levels of agro-biodiversity, which represents a key point in ensuring the

adaptability and resilience of agro-ecosystems in the global challenge to produce more and better food in a sustainable way. The biodiversity of vegetable crops includes genetic diversity—both as species diversity (interspecific diversity) and as a diversity of genes within a species (intraspecific diversity) with regard to the vegetable varieties grown—and the diversity of agro-ecosystems (agro-biodiversity). The purpose of this Special Issue is to publish high-quality research papers addressing recent progress and perspectives on different aspects

related to the biodiversity of vegetable crops. Original, high-quality contributions that have not yet been published, or that are not currently under review by other journals have been sought. The papers in this Special Issue cover a broad range of aspects and report recent research results regarding agro-biodiversity, which continues to be of significant relevance for both genetic and agricultural applications. All contributions are of significant relevance and could stimulate further research in this area.
