The Masterpiece - Émile Zola 2016-07-10

The Masterpiece is the tragic story of Claude Lantier, an ambitious and talented young artist from the provinces who has come to conquer Paris and is conquered by the flaws in his own genius. While his boyhood friend Pierre Sandoz becomes a successful novelist, Claude's originality is mocked at the Salon and turns gradually into a doomed obsession with one great canvas. Life - in the form of his model and wife Christine and their deformed child Jacques - is sacrificed on the altar of Art. The Masterpiece

is the most autobiographical of the twenty novels in Zola's Rougon-Macquart series. Set in the 1860s and 1870s, it provides a unique insight into his career as a writer and his relationship with Cézanne, a friend since their schooldays in Aix-en-Provence. It also presents a well-documented account of the turbulent Bohemia world in which the Impressionists came to prominence despite the conservatism of the Academy and the ridicule of the general public. ABOUT THE SERIES: For over 100 years Oxford World's Classics has made available the widest range of literature from around the globe. Each affordable volume reflects Oxford's commitment to scholarship, providing the most accurate text plus a wealth of other valuable features, including expert introductions by leading authorities, helpful notes to clarify the text, up-to-date bibliographies for further study, and much more.

Dynamics of Learning in Neanderthals and Modern Humans Volume 2 - Takeru Akazawa
2014-01-27

This volume is the second of two volumes of proceedings from the International Conference on the Replacement of Neanderthals by Modern Humans, which took place in Tokyo in November 2012. This second volume reports, in four major sections, findings by cultural anthropologists, physical anthropologists, engineering scientists and neurophysiologists, integrated in multidisciplinary fashion to solidify the overall understanding of the mechanics of replacement from cognitive and physical perspectives. Part 1 provides examinations of replacement related questions from various perspectives in cognition and psychology. Part 2, consisting of studies rooted in body science and genetics, provides

detailed findings which fill in the broader frame of the replacement phenomenon. Part 3 presents a collection of papers whose findings about fossil crania and brain morphology shed direct light on immediate questions regarding replacement. Part 4 provides illuminations similar to those in part 3, but arising from the analytical empowerment afforded by neuroscience. The collection of 26 papers in this volume makes available to readers both broad and narrow insights on the mechanisms of the replacement/assimilation of Neanderthals by modern humans and at the same time provides a model of new-paradigm multidisciplinary collaboration on a complex problem.

The Uses of Enchantment - Bruno Bettelheim
2010-05-11

Winner of the National Book Award and National Book Critics Circle Award "A charming book about enchantment, a profound book about fairy tales."—John Updike, *The New York Times Book Review* Bruno Bettelheim was one of the great child psychologists of the twentieth century and perhaps none of his books has been more

influential than this revelatory study of fairy tales and their universal importance in understanding childhood development.

Analyzing a wide range of traditional stories, from the tales of Sindbad to "The Three Little Pigs," "Hansel and Gretel," and "The Sleeping Beauty," Bettelheim shows how the fantastical, sometimes cruel, but always deeply significant narrative strands of the classic fairy tales can aid in our greatest human task, that of finding meaning for one's life.

Defining Authorship, Debating Authenticity

- Roberta Berardi 2020-10-26

This volume explores the themes of authorship and authenticity - and connected issues - from the Classical Antiquity to the Renaissance. Its reflection is constructed within a threefold framework. A first section includes topics dealing with dubious or uncertain attribution of

ancient works, homonymous writers, and problems regarding the reliability of compilation literature. The middle section goes through several issues concerning authorship: the balance between the author's contribution to their own work and the role of collaborators, pupils, circles, reviewers, scribes, and even older sources, but also the influence of different compositional stages on the concept of 'author', and the challenges presented by anonymous texts. Finally, a third crucial section on authenticity and forgeries concludes the book: it contains contributions dealing with spurious works - or sections of works - , mechanisms of interpolation, misattribution, and deliberate forgery. The aim of the book is therefore to exemplify the many nuances of the complex problems of authenticity and authorship of ancient texts.

Handbook on the Economics of Sport -

Wladimir Andreff 2006

The editors should be commended for taking on

such a big task, and succeeding so well. This book should be in the library of every institution where students have to write a paper that may be related to sport, or on the shelf of any lecturer teaching economics or public finance who has even a remote interest in sport. The material is very accessible, and useful in many different settings. Ruud H. Koning, *Jahrbücher f. Nationalökonomie u. Statistik* Edward Elgar's brilliant market niche is identifying a topic in economics, finding editors who know the area backwards and challenging them to assemble the best cross-section of relevant articles either already published or newly commissioned. *Handbook on the Economics of Sport* is Edward Elgar at its very best. If you love economics you'll find many fascinating insights here; if you love sport but know little economics then this book is mostly accessible and will teach you a lot; and if you are a sports-mad economist then you will be in hog heaven. Furthermore, if, like this reviewer, you are broadly very sceptical about

the reports consultants produce for governments on the supposed economic windfall from hosting a big event or subsidising a stadium then you will get a lot of good counter-arguments in this volume. Indeed there are several chapters on the above theme that I'm sure I'll be copying frequently to government officials in years to come. . . The demand for sport is a fascinating subject and it is hard to pick out just one chapter from the second section. Read them all they make a wonderful 65-page treat. . . Part VI was a real feast, a smorgasbord. . . This is a magnificent piece of work and the 36-page index rounds it all off splendidly. John Blundell, *Economic Affairs* The book covers the most important areas of research of an emerging economic sub-discipline spanning the past half a century. It serves admirably the purpose of an introduction into the rich and growing area of reflection for all concerned. . . the editors and authors of the *Handbook* have done a commendable job of accumulating sophisticated

material for many economists, managers, politicians and self-conscious fans, who are sure to find excellent training ground for the whole heptathlon. . . This book will be invaluable for advanced students investigating professional sport. From the point of view of lawyers, particularly those engaged with the relationship between law and sports governance, the Handbook offers invaluable analysis of the economic issues that are alluded to in those debates but rarely examined in detail. . . These insights will also prove useful for policy analysts and sports administrators for whom many sections should be considered mandatory reading. Aleksander Sulejewicz, Journal of Contemporary European Research Over 800 pages on the economics of sport. What a feast! What a treat! The editors have done a wonderful job both in terms of breadth from David Beckham to child labour in Pakistan and depth, tournaments and luxury taxes for example. . . The 86 chapters are uniformly of a very high

standard and illuminating. And there are real gems in some of the contributions. British Journal on the Economics of Sport This very interesting and comprehensive book achieves its objective, namely to present an overview of research in sports economics at an introductory level. . . [The editors] have produced an excellent reference book that belongs in all academic institutions libraries. It provides extensive introduction to the growing body of literature in the rising field of economics of sport. The book s relevant monographs should be read by institutions, cities and countries prior to their committing major resources towards sports facilities or a sporting event. James Angresano, Journal of Sports Economics One could think of this book as the sports-and-economics counterpart to Joy of Cooking, because it will satisfy the needs of those with a keen interest in such subjects as the **Italian Folktales** - Italo Calvino 1980 Retells two hundred traditional Italian tales,

including the stories of a fearless little man, a prince who married a frog, and a woman who lived on wind

Human Paleoneurology - Emiliano Bruner 2014-07-21

The book presents an integrative review of paleoneurology, the study of endocranial morphology in fossil species. The main focus is

on showing how computed methods can be used to support advances in evolutionary neuroanatomy, paleoanthropology and archaeology and how they have contributed to creating a completely new perspective in cognitive neuroscience. Moreover, thanks to its multidisciplinary approach, the book addresses students and researchers approaching human paleoneurology from different angles and for different purposes, such as biologists, physicians, anthropologists, archaeologists and computer scientists. The individual chapters, written by international experts, represent authoritative reviews of the most important topics in the field. All the concepts are presented in an easy-to-understand style, making them accessible to university students, newcomers and also to anyone interested in understanding how methods like biomedical imaging, digital anatomy and computed and multivariate morphometrics can be used for analyzing ontogenetic and phylogenetic changes according

to the principles of functional morphology, morphological integration and modularity.

Renaissance Rewritings - Helmut Pfeiffer

2017-09-25

'Rewriting' is one of the most crucial but at the same time one of the most elusive concepts of literary scholarship. In order to contribute to a further reassessment of such a notion, this volume investigates a wide range of medieval and early modern literary transformations, especially focusing on texts (and contexts) of Italian and French Renaissance literature. The first section of the book, "Rewriting", gathers essays which examine medieval and early modern rewritings while also pointing out the theoretical implications raised by such texts. The second part, "Rewritings in Early Modern Literature", collects contributions which account for different practices of rewriting in the Italian and French Renaissance, for instance by analysing dynamics of repetition and duplication, verbatim reproduction and free

reworking, textual production and authorial self-fashioning, alterity and identity, replication and multiplication. The volume strives at shedding light on the complexity of the relationship between early modern and ancient literature, perfectly summed up in the motto written by Pietro Aretino in a letter to his friend the painter Giulio Romano in 1542: "Essere modernamente antichi e anticamente moderni".

Football and Fascism - Simon Martin 2004-09-01

Institutionalized as a fascist game in Mussolini's Italy, football was exploited domestically in an attempt to develop a sense of Italian identity and internationally as a diplomatic tool to improve Italy's standing in the global arena. The 1930s were the zenith of achievement for Italian football. Italy hosted and won the 1934 World Cup tournament and retained the trophy in 1938 in France. In the 1936 Berlin Olympics, Italy won the soccer tournament with a team of university students, affirming the nation's international football supremacy. At club level,

calcio was reorganized into a single, national league in 1929namely, Serie Aafter which the first Italian club teams emerged to dominate European competition and threaten previous British notions of supremacy.In this time, Italian Fascism fully exploited the opportunities football provided to shape public opinion, penetrate daily life, and reinforce conformity. By politicizing the game, Fascism also sought to enhance the regimes international prestige and inculcate nationalist values. The author argues that the regimes attempt to use sport to formulate identity actually forced it to recognize existing tensions within society, thereby paradoxically permitting the existence of diversity and individuality.The book serves as a cultural history of Fascism in Italy viewed through the lens of football.

Heroicus. Gymnasticus. Discourses 1 And 2 -

Philostratus 2014

In the writings of Philostratus (ca. 170-ca. 250 CE), the renaissance of Greek literature in the second century CE reached its height. His *Life of Apollonius of Tyana*, *Lives of the Sophists*, and *Imagines* reconceive in different ways Greek religion, philosophy, and art in and for the world of the Roman Empire. In this volume, *Heroicus* and *Gymnasticus*, two works of equal creativity and sophistication, together with two brief *Discourses* (*Dialexeis*), complete the Loeb edition of his writings. *Heroicus* is a conversation in a vineyard amid ruins of the Protesilaus shrine (opposite Troy on the Hellespont), between a wise and devout vinedresser and an initially skeptical Phoenician sailor, about the beauty, continuing powers, and worship of the Homeric heroes. With information from his local hero, the vinedresser reveals unknown stories of the Trojan campaign especially featuring Protesilaus and Palamedes, and describes complex, miraculous, and violent

rituals in the cults of Achilles. *Gymnasticus* is the sole surviving ancient treatise on sports. It reshapes conventional ideas about the athletic body and expertise of the athletic trainer and also explores the history of the Olympic Games and other major Greek athletic festivals, portraying them as distinctive venues for the display of knowledge.

On the Track of the Books - Roberta Berardi

2019-06-17

This book offers the hint for a new reflection on ancient textual transmission and editorial practices in Antiquity. In the first section, it retraces the first steps of the process of ancient writing and editing. The reader will discover how the book is both a material object and a metaphorical personification, material or immaterial. The second section will focus on corpora of Greek texts, their formation, and their paratextual apparatus. Readers will explore various issues dealing with the mechanisms that are at the basis of the assembling of ancient Greek texts, but great attention will also be given to the role of ancient scholarly work. The third section shows how texts have two levels of authorship: the author of the text, and the scribe who copies the text. The scribe is not a medium, but plays a crucial role in changing the text. This section will focus on the protagonists of some interesting cases of textual transmission, but

also on the books they manufactured or kept in the libraries, and on the words they engraved on stones. Therefore, the fresh voices of the contributors of this book, offer new perspectives on established research fields dealing with textual criticism.

Confessions of an Italian - Ippolito Nievo

2014-05-29

An overlooked classic of Italian literature, this epic and unforgettable novel recounts one man's long and turbulent life in revolutionary Italy. At the age of eighty-three and nearing death, Carlo Altoviti has decided to write down the confessions of his long life. He remembers everything: his unhappy childhood in the kitchens of the Castle of Fratta; romantic entanglements during the siege of Genoa; revolutionary fighting in Naples; and so much more. Throughout, Carlo lives only for his twin passions in life: his dream of a unified, free Italy and his undying love for the magnificent but inconstant Pisana. Peopled by a host of

unforgettable characters - including drunken smugglers, saintly nuns, scheming priests, Napoleon and Lord Byron - this is an epic historical novel that tells the remarkable and inseparable stories of one man's life and the history of Italy's unification. Ippolito Nievo was born in 1831 in Padua. Confessions of an Italian, written in 1858 and published posthumously in 1867, is his best known work. A patriot and a republican, he took part with Garibaldi and his Thousand in the momentous 1860 landing in Sicily to free the south from Bourbon rule. Nievo died before he reached the age of thirty, when his ship, en route from Palermo to Naples, went down in the Tyrrhenian Sea in early 1861. He was, Italo Calvino once said, the sole Italian novelist of the nineteenth century in the 'daredevil, swashbuckler, rambler' mould so dear to other European literatures. Frederika Randall has worked as a cultural journalist for many years. Her previous translations include Luigi Meneghello's *Deliver Us* and Ottavio

Cappellani's Sicilian Tragedee and Sergio Luzzatto's Padre Pio: Miracles and Politics in a Secular Age. Lucy Riall is Professor of Comparative History at the European University Institute. Her many books include Garibaldi. Invention of a Hero. 'Of all the furore that came out of the Risorgimento, only Manzoni and Nievo really matter today' - Umberto Eco 'The one 19th century Italian novel which has [for an Italian reader] that charm and fascination so abundant

in foreign literatures' - Italo Calvino 'Perhaps the greatest Italian novel of the nineteenth century' - Roberto Carnero 'A spirited appeal for liberté, égalité and fraternité, the novel is also an astute, scathing and amusing human comedy, a tale of love, sex and betrayal, of great wealth and grinding poverty, of absolute power and scheming submission, of idealism and cynicism, courage and villainy' - The Literary Encyclopedia **Index for Inclusion** - Tony Booth 2011
