[Our National Monuments](#) - Q. T. Luong
2021-09-25

From the north woods of Maine to the cactus-filled deserts of Arizona, America's national monuments include vast lands rivaling the national parks in beauty, diversity, and historical

heritage. These critically important landscapes, mostly under the Bureau of Land Management supervision, are often under the radar with limited visitor information available yet offer considerable opportunities for solitude and adventure compared to bustling national parks. The Antiquities Act of 1906 gave Presidents the authority to proclaim national monuments as an expedited way to protect areas of natural or cultural significance. Since then, 16 Presidents have used the Antiquities Act to preserve some of America's most treasured public lands and waters. In 2017, an unprecedented Executive Order was issued questioning these designations by calling for the review of 27 national monuments across 11 states and two oceans, opening the threat of development to vulnerable and irreplaceable natural resources. Our National Monuments introduces these spectacular and unique landscapes, in the first book of its kind. Accompanying the collection of scenic photographs is an invaluable guide

including maps of each national monument with carefully selected attractions identified and described based on the author's wide-ranging explorations. Our National Monuments invites readers to experience for themselves these lands and learn about the people and cultures who came before, and to whom these lands are still sacred places. QT Luong is one of the most prolific photographers working in America's public lands and the author of *Treasured Lands*, the best-selling and acclaimed photography book about the national parks. Combining hundreds of his sumptuously printed photographs with essays from citizen conservation associations caring for these national treasures; including a foreword by former Secretary of the Interior Sally Jewell and photographs of marine national monuments from Ansel Adams award-winning photographer Ian Shive, the comprehensive portrayals of Our National Monuments help readers understand how these essential landscapes are preserving America's past and

shaping its future.

Italian Medieval Armies 1300-1500 - David Nicolle 1983-03-24

Mercenaries were a common feature throughout most of Europe in the 14th and 15th centuries, and had been known far earlier. But nowhere did such a sophisticated system of hiring, payment and organisation of mercenaries develop as it did in Italy. The condottiere - whose name came from the condotta or contract between himself and his employer - was the result. Whether commander or humble trooper, the condottiere was a complete professional. His skill has never been doubted, but his loyalty and dedication to a particular cause often has. David Nicolle provides a fascinating exploration of the condottiere; his roles, arms and equipment. Armies of the Medieval Italian Wars 1125-1325 - Gabriele Esposito 2019-02-21

The great powers of medieval Europe fought continuously in the Italian peninsula between the 12th and 14th centuries as they sought to expand their territory. Invading armies from Germany - the Holy Roman Empire - saw the creation of the defensive Lombard League of northern Italian city-states. These struggles resulted in conflicts between rival confederacies, which in turn proved to be the catalysts for developments in organisation and tactics. Italian

urban militias became better organised and equipped, the Imperial armies went from being mostly German to multi-national forces, and both sides became reliant on mercenary forces to prosecute their wars. After the 1260s, France, relying mainly on armoured cavalry, and Spain, with their innovative light infantry, vied for control of southern Italy. On the seas, the great naval powers of Genoa, Pisa and Venice became fierce rivals, as they created great trading empires, bringing the treasures of the east into feudal Europe. Using detailed colour plates, this beautifully illustrated book describes the myriad of armies and navies that fought for control of Italy in the Middle Ages.
