Beasts of Burden: Animal Rites - Evan Dorkin 2006-06-27

Welcome to Burden Hill — a picturesque little town adorned with white picket fences and green, green grass, home to a unique team of paranormal investigators. Beneath this shiny exterior, Burden Hill harbors dark and sinister secrets, and it's up to a heroic gang of dogs — and one cat — to protect the town from the evil forces at work. These are the Beasts of Burden Hill — Pugs, Ace, Jack, Whitey, Red and the Orphan — whose early experiences with the paranormal (including a haunted doghouse, a witches' coven, and a pack of canine zombies) have led them to become members of the Wise Dog Society, official animal agents sworn to protect their town from evil. This turns out to be no easy task, as they soon encounter demonic cannibal frogs, tortured spirits, a secret rat society, and a bizarre and deadly resurrection in the Burden Hill cemetery — events which lead to fear and heartbreak as our four-legged heroes discover that the evil within Burden Hill is growing and on the move. Can our heroes overcome these supernatural menaces? Can evil be bested by a paranormal team that doesn't have hands? And even more importantly, will Pugs ever shut the hell up? Adventure, mystery, horror, and humor thrive on every page of *Beasts of Burden* — a comic-book series that will capture readers' hearts and haunt their dreams. Award-winning comics creators Evan Dorkin (Milk and Cheese) and Jill Thompson (Scary Godmother) first introduced these very special investigators in *The Dark Horse Book of Hauntings* and the other *Dark*

discovery in the history of modern science. In this beautifully observed, deeply personal book, Georgetown scientist Sarah Stewart Johnson tells the story of how she and other researchers have scoured Mars for signs of life, transforming the planet from a distant point of light into a world of its own. Johnson's fascination with Mars began as a child in Kentucky, turning over rocks with her father and looking at planets in the night sky. She now conducts fieldwork in some of Earth's most hostile environments, such as the Dry Valleys of Antarctica and the salt flats of Western Australia, developing methods for detecting life on other worlds. Here, with poetic precision, she interlaces her own personal journey—as a female scientist and a mother—with tales of other seekers, from Percival Lowell, who was convinced that a utopian society existed on Mars, to Audouin Dollfus, who tried to carry out astronomical observations from a stratospheric balloon. In the process, she shows how the story of Mars is also a story about Earth: This other world has been our mirror, our foil, a telltale reflection of our own anxieties and

yearnings. Empathetic and evocative, *The Sirens of Mars* offers an unlikely natural history of a place where no human has ever set foot, while providing a vivid portrait of our quest to defy our isolation in the cosmos.
