Children's Self-determination in the Context of Early Childhood Education and Services - Federico Farini 2019-06-26

This book investigates the position of young children's self-determination within a range of social contexts, such as education, social care, mass-media, health, politics, law and the family. It brings to the fore the voices of the children in the present, with their interests, agendas and rights. Based on original primary research, the chapters tackle hegemonic discourses on children's self-determination as well as current policies and practices. They address a broad range of topics, from the planning of role-play to national policies, from the use of digital technologies for pedagogy to children's health and well-being, and from democratic practices in the classroom to the preservation of traditional family values. The book presents case studies to unravel how childhood and young children's self-determination are constructed at the intersection with intergenerational relationships. Coming from different disciplines and using a diverse range of methodological traditions, the contributions in the volume eventually converge to generate a rich, complex and multi-layered analysis of contemporary cultures of childhood

and young children's rights.

Dante's Vita Nuova and the New Testament - William Franke 2021

"Modelling knowledge as revelation and theology as poetry, this powerful new reading of the Vita nuova not only challenges Dante scholars to reconsider the book's speculative emphases but also offers the general reader an accessible yet penetrating exploration of some of the Western tradition's most far-reaching ideas surrounding love and knowledge. Dante's 'little book', included in full here in an original parallel translation, captures in its first emergence the same revolutionary ferment that would later become manifest both in the larger oeuvre of this great European writer and in the literature of the entire Western canon. William Franke demonstrates how Dante's youthful poetic autobiography disrupts sectarian thinking and reconciles the seeming contraries of divine

revelation and human invention, while also providing the means for understanding religious revelation in the Bible. Ultimately, this revolutionary unification of Scripture and poetry shows the intimate working of love at the source of inspired knowing"--

The Years of Alienation in Italy offers an interdisciplinary overview of the socio-political, psychological, philosophical, and cultural meanings that the notion of alienation took on in Italy between the 1960s and the 1970s. It addresses alienation as a social condition of

estrangement caused by the capitalist system, a pathological state of the mind and an ontological condition of subjectivity. Contributors to the edited volume explore the pervasive influence this multifarious concept had on literature, cinema, architecture, and photography in Italy. The collection also theoretically reassesses the notion of alienation from a novel perspective, employing Italy as a paradigmatic case study in its pioneering role in the revolution of mental health care and factory work during these two decades.
