Photographing Mussolini - Alessandra Antola Swan 2020-12-10

This pioneering book offers the first account of the work of the photographers, both official and freelance, who contributed to the forging of Mussolini's image. It departs from the practice of using photographs purely for illustration and places them instead at the centre of the analysis. Throughout the 1930s photographs of the Italian dictator Benito Mussolini were chosen with much care by the regime. They were deployed to highlight those physical traits - the piercing eyes, protruding jaw, shaved head - that were meant to evoke the Duce's strength, determination and innate sense of leadership in the mind of his contemporaries. The chapters in this volume explore the photographic image in the socio-political context of the time and shows how it was a significant contributor to the development of Italian mass culture between the two world wars.

Race, Nation and Gender in Modern Italy - Gaia Giuliani 2018-05-29

This book explores intersectional constructions of race and whiteness in modern and contemporary Italy. It contributes to transnational and interdisciplinary reflections on these issues through an analysis of political debates and social practices, focusing in particular on visual materials from the unification of Italy (1861) to the present day. Giuliani draws attention to rearticulations of the transnationally constructed Italian 'colonial archive' in Italian racialised identity-politics and cultural racisms across processes of nation building, emigration, colonial expansion, and the construction of the first post-fascist Italian society. The author considers the 'figures of race' peopling the Italian colonial archive as composing past and present ideas and representations of (white) Italianness and racialised/gendered Otherness. Students and scholars across a range of disciplines, including Italian studies, political philosophy, sociology, history, visual and cultural studies, race and whiteness studies and gender studies, will find this book of interest.

Handbook of International Futurism - Günter Berghaus 2018-12-17

The Handbook of International Futurism is the first reference work ever to presents in a comparative fashion all media and countries in which the movement, initiated by F.T. Marinetti in 1909, exercised a particularly noteworthy influence. The handbook offers a synthesis of the state of scholarship regarding the international radiation of Futurism and its influence in some fifteen artistic disciplines and thirty-eight countries. While acknowledging the great achievements of the movement in the visual and literary arts of Italy and Russia, it treats Futurism as an international, multidisciplinary phenomenon that left a lasting mark on the manifold artistic manifestations of the early twentieth-century avant-garde. Hundreds of artists, who in some phase in their career absorbed Futurist ideas and stylistic devices, are presented in the context of their national traditions, their international connections and the media in which they were predominantly active. The handbook acts as a kind of multi-disciplinary, geographical encyclopaedia of Futurism and gives scholars with varying levels of experience a detailed overview of all countries and disciplines in which the movement had a major impact.

Eurasianism and the European Far Right - Marlene Laruelle 2015-07-01

The 2014 Ukrainian crisis has highlighted the pro-Russia stances of some European countries, such as Hungary and Greece, and of some European parties, mostly on the far-right of the political spectrum. They see themselves as victims of the EU "technocracy" and liberal moral values, and look for new allies to denounce the current "mainstream" and its

austerity measures. These groups found new and unexpected allies in Russia. As seen from the Kremlin, those who denounce Brussels and its submission to U.S. interests are potential allies of a newly re-assertive Russia that sees itself as the torchbearer of conservative values. Predating the Kremlin's networks, the European connections of Alexander Dugin, the fascist geopolitician and proponent of neo-Eurasianism, paved the way for a new pan-European illiberal ideology based on an updated reinterpretation of fascism. Although Dugin and the European far-right belong to the same ideological world and can be seen as two sides of the same coin, the alliance between Putin's regime and the European far-right is more a marriage of convenience than one of true love. This unique book examines the European far-right's connections with Russia and untangles this puzzle by tracing the ideological origins and individual paths that have materialized in this permanent dialogue between Russia and Europe.

Reframing Luchino Visconti - Ivo Blom 2018-03-21

Reframing Luchino Visconti: Film and Art gives new and unique insights into the roots of the visual vocabulary of one of Italy's most reputed film authors. It meticulously researches Visconti's appropriation of European art in his set and costume design, from pictorial citations and the archaeology of the set to the use of portraits and pictorial references in costume design. Yet it also investigates Visconti's cinematography in combination with his mise-en-scène in terms of staging, framing, mobile framing, and mirroring. Here not only aesthetic conventions from art but also those from silent and sound cinema have been clearly appropriated by Visconti and his crew. This book gives answers to the question: where does the visual splendour of Visconti's films come from? "This book, apart from showing a long-standing passion and fidelity, gives us one of the most original international researches ever produced on Visconti's work. Through thorough archival research and numerous interviews with people close to Visconti such as his crew members, Ivo Blom's monograph reveals the extraordinary network of iconographic and cultural connections that unite Visconti's work, expose Visconti's cinematographic signature and link different historic events with crucial moments in Visconti's personal life." - Gian Piero Brunetta (Università di Padova) CLUES is an international scientific series covering research in the field of culture, history and heritage which have been written by, or were performed under the supervision of members of the research institute CLUE+.

Luigi Dallapiccola and Musical Modernism in Fascist Italy - Ben Earle 2013-08-15

Luigi Dallapiccola is widely considered a defining figure in twentieth-century Italian musical modernism, whose compositions bear passionate witness to the historical period through which he lived. In this book, Ben Earle focuses on three major works by the composer: the one-act operas *Volo di notte* ('Night Flight') and *Il prigioniero* ('The Prisoner'), and the choral *Canti di prigionia* ('Songs of Imprisonment'), setting them in the context of contemporary politics to trace their complex path from fascism to resistance. Earle also considers the wider relationship between musical modernism and Italian fascism, exploring the origins of musical modernism and investigating its place in the institutional structures created by Mussolini's regime. In doing so, he sheds new light on Dallapiccola's work and on the cultural politics of the early twentieth century to provide a history of musical modernism in Italy from the fin de siècle to the early Cold War.

Smart Planning: Sustainability and Mobility in the Age of Change - Rocco Papa 2018-06-12

This book offers an overview of sustainability and urban mobility in the context of urban planning – topics that are of considerable interest in the development of smart cities. Environmental sustainability is universally recognized as a fundamental condition for any urban policy or urban management activity, while mobility is essential for the survival of complex urban systems. The new opportunities offered by innovations in the mobility of people, goods and information, as well as radically changing interactions and activities are transforming cities. Including contributions by urban planning scholars, the book provides an up-to-date picture of the latest studies and innovative policies and practices in Italy, of particular interest due to its spatial, functional and social peculiarities. Sustainability and mobility must form the basis of "smart planning" – a new dimension of urban planning linked to two main innovations: procedural innovation in the management of territorial transformations and the technological innovation of the generation, processing and distribution of data (big data) for the creation of new "digital environments" such as GIS, BIM, models of augmented and mixed reality, useful for describing changes in human settlement in real time.

The comprehensive analysis of the segmental and metrical system of the Swiss German dialect of Thurgovian provides a significant contribution to both phonetic and phonological theory. Based on the author's original fieldwork and experimental investigations, it is the first in-depth study of this area, tracing it back also to its Old High German roots, particularly that of the dialect of Notker. Quantity alternations - notably word-initial long/short consonantal alternations - asymmetric neutralization of phonetic-phonological contrasts, stress and weight are most prominent among the theoretical issues on which Thurgovian phonology is brought to bear.
