Tax and the Digital Economy - Werner Haslehner 2019-05-01

The increasingly digitalized global economy is undermining the usefulness of many traditional tax concepts. In addition to issues of double taxation and double non-taxation, important questions arise concerning the allocation of taxing rights in respect of income from cross-border digital transactions. This is the first book to analyse what changes are possible, necessary and feasible in order to forestall the unravelling of the existing international tax framework. Focusing in turn on the legal framework, specific proposals for adapting tax concepts for the digital economy, types of transactions and administrative issues such as those around data protection and digital currencies, the expert contributors discuss such challenges to taxation as the following: the pervasiveness of intangible assets; new value creation models; the ascendance of the sharing economy and digital services; virtual currencies; the importance of user participation for digital platforms; cloud computing; the impact of Big Data on tax enforcement; virtual business presence; and the influence of robotization. Throughout, the authors describe and analyse proposals made by the Organisation for Economic Co-operation and Development (OECD), the European Union (EU) and individual countries and their likely impact going forward. They also attend to the limits imposed on reform possibilities by public international law, EU law and constitutional law. It is generally acknowledged that there is a need to monitor how the digital transformation may be impacting value creation. This book is a key milestone toward developing a durable, long-term solution to the tax challenges posed by the digitalization of the economy. With its thorough scrutiny of proposals for digital services tax and virtual permanent establishments, insightful analysis of digital services and detailed description of the impact of big data on tax administration and taxpayer protection, it will quickly prove indispensable for tax practitioners and the international tax community more generally.

The Mesh - Lisa Gansky 2010-09-23

A simple, powerful idea that's reinventing the way smart, adaptive companies do business. Most businesses follow the same basic formula: create a product or service, sell it, and collect money. What Lisa Gansky calls "Mesh" businesses throw this model out the window. Instead, these companies use social media, wireless networks, and data crunched from every available source to provide people with goods and services at the exact moment they need them, without the burden and expense of owning them outright. The Mesh gives companies a better understanding of what customers really want. Already, hundreds of successful Mesh companies are redefining how we interact with the people, goods, and services in our lives. These businesses are easier to start and spreading like wildfire, from bike sharing and home exchanges to peer-to-peer lending, energy cooperatives, and open source design. Consider: • ZipCar profits from streamlined car sharing • Kickstarter connects artists with funding from enthusiastic supporters •

Music Gym makes finding a recording studio as easy as joining a gym The Mesh reveals the next wave of information-enabled commerce, showing readers how to plug in and profit.

The Rise of the Robots - Martin Ford 2015-09-03

Intelligent algorithms are already well on their way to making white collar jobs obsolete: travel agents, data-analysts, and paralegals are currently in the firing line. In the near future, doctors, taxi-drivers and ironically even computer programmers are poised to be replaced by 'robots'. Without a radical reassessment of our economic and political structures, we risk the very implosion of the capitalist economy itself. In *The Rise of the Robots*, technology expert Martin Ford systematically outlines the achievements of artificial intelligence and uses a wealth of economic data to illustrate the terrifying societal implications. From health and education to finance and technology, his warning is stark - all jobs that are on some level routine are likely to eventually be automated, resulting in the death of traditional careers and a hollowed-out middle class. The robots are coming and we have to decide - now - whether the future will bring prosperity or catastrophe.

The Retail Revival - Doug Stephens 2013-03-11

Traditional retail is becoming increasingly volatile and challenged as a business model. Brick-and-mortar has shifted to online, while online is shifting into pop-up storefronts. Virtual stores in subway platforms and airports are offering new levels of convenience for harried commuters. High Street and Main Street are becoming the stuff of nostalgia. The Big Box is losing ground to new models that attract consumers through their most-trusted assistant—the smartphone. What's next? What's the future for you—a retailer—who is witnessing a tsunami of change and not knowing if this means grasping ahold of new opportunity or being swept away? *The Retail Revival* answers these questions by looking into the not-so-distant retail past and by looking forward into a future that will continue to redefine retail and its enormous effect on society and our economies. Massive demographic and economic shifts, as well as historic levels of technological and media disruption, are turning this once predictable industry—where “average” was king—into a sea of turbulent change, leaving consumer behavior permanently altered. Doug Stephens, internationally renowned consumer futurist, examines the key seismic shifts in the market that have even companies like Walmart and Procter & Gamble scrambling to cope, and explores the current and future trends that will completely change the way we shop. *The Retail Revival* provides no-nonsense clarity on the realities of a completely new retail marketplace—realities that are driving many industry executives to despair. But the future need not be dark. Stephens offers hope and guidance for any businesses eager to capitalize on these historic shifts and thrive. Entertaining and thought-provoking, *The Retail Revival* makes sense of a brave new era of consumer behavior in which everything we thought we knew about retail is being completely reimaged. Praise for *The Retail Revival* “It doesn't matter what type of retail you do—if you sell something, somewhere, you need to read Doug Stephens' *The Retail Revival*. Packed with powerful insights on the changing retail environment and what good retailers should be thinking about now, *The Retail Revival* is easy to read, well-organized and provides essential food for thought.” — Gregg Saretsky, President and CEO, WestJet “This book captures in sharp detail the deep and unprecedented changes driving new

consumer behaviors and values. More importantly, it offers clear guidance to brands and retailers seeking to adapt and evolve to meet entirely new market imperatives for success.” —John Gerzema, Author of *Spend Shift* and *The Athena Doctrine* “*The Retail Revival* is a critical read for all marketing professionals who are trying to figure out what's next in retail... Planning Matter - Robert A. Beauregard 2015-11-03

City and regional planners talk constantly about the things of the world—from highway interchanges and retention ponds to zoning documents and conference rooms—yet most seem to have a poor understanding of the materiality of the world in which they're immersed. Too often planners treat built forms, weather patterns, plants, animals, or regulatory technologies as passively awaiting commands rather than actively involved in the workings of cities and regions. In the ambitious and provocative Planning Matter, Robert A. Beauregard sets out to offer a new materialist perspective on planning practice that reveals the many ways in which the nonhuman things of the world mediate what planners say and do. Drawing on actor-network theory and science and technology studies, Beauregard lays out a framework that acknowledges the inevitable insufficiency of our representations of reality while also engaging more holistically with the world in all of its diversity—including human and nonhuman actors alike.

Labics is a rising Rome-based architectural firm that has gained great international acclaim in recent years for both its projects and its submissions to major competitions. Its guiding principle is the idea of "structure." Each of the firm's projects--which range from housing and office buildings to museums, cultural centers, schools, subway stations, and public spaces--is intended to exemplify the importance of the respective type of structure. Labics--Structures is the first book on Labics's remarkable and rapidly growing body of work. The book is arranged in four chapters that explore the idea of structure in different contexts: "Geometric," "Bearing," "Circulation," and "Public Space Structures." Alongside topical essays, it features twenty projects selected by the firm's founding directors, Maria Claudia Clemente and Francesco Isidori, to represent the diversity of the firm's work, as well as its wide geographic reach--with buildings in Italy, Finland, Switzerland, England, Bosnia and Herzegovina, Saudi Arabia, and Iran. Each project is documented with atmospheric photographs and a wealth of plans and diagrams to illustrate concepts and details.

English Tourism Discourse. Insights Into the Professional, Promotional and Digital Language of Tourism - Stefania M. Maci 2020

Community - Zygmunt Bauman 2013-05-08

'Community' is one of those words that feels good: it is good 'to have a community', 'to be in a community'. And 'community' feels good because of the meanings which the word conveys, all of them promising pleasures, and more often than not the kind of pleasures which we would like to experience but seem to miss. 'Community' conveys the image of a warm and comfortable place, like a fireplace at which we warm our hands on a frosty day. Out there, in the street, all sorts of dangers lie in ambush; in here, in the community, we can relax and feel safe. 'Community' stands for the kind of world which we long to inhabit but which is not, regrettably, available to us. Today 'community' is another name for paradise lost - but for a paradise which we still hope to find, as we feverishly search for the roads that may lead us there. But there is a price to be paid for the privilege of being in a community. Community promises security but seems to deprive us of freedom, of the right to be ourselves. Security and freedom are two equally precious and coveted values which could be balanced to some degree, but hardly ever fully reconciled. The tension between security and freedom, and between community and individuality, is unlikely ever to be resolved. We cannot escape the dilemma but we can take stock of the opportunities and the dangers, and at least try to avoid repeating past errors. In this important new book, Zygmunt Bauman takes stock of these opportunities and dangers and, in his distinctive and brilliant fashion, offers a much-needed reappraisal of a concept that has become central to current debates about the nature and future of our societies.

Rogue Economics - Loretta Napoleoni 2011-01-04

What do Eastern Europe's booming sex trade, America's subprime mortgage lending scandal, China's fake goods industry, and celebrity philanthropy in Africa have in common? And will the entire system be transformed by the advent of sharia economics? With the precision of an economist and the narrative deftness of a storyteller, syndicated journalist Loretta Napoleoni examines how the world is being reshaped by dark economic forces, creating victims out of millions of ordinary people whose lives have become trapped inside a fantasy world of consumerism. Trust in Market Relationships - Sandro Castaldo 2007

Trust in Market Relationships illustrates that the importance of trust in a commercial arena has intensified as markets have become more complex. As business relationships become ever critical for a firm's economic results in highly competitive markets, and trust represents the basic platform for the development of successful long-term collaborations. Sandro Castaldo attempts to order the analytical complexity and myriad perspectives that characterise research on trust. He aims not to simplify this complexity, but to present guidelines for an interpretative model of trust, and to define fundamental concepts for trust management strategies. Issues explored include: the nature of trust, the relevance of trust to firms' intangible assets and value creation; dimensions of trust in marketing studies; psychological, sociological and organizational studies and the transactional cost theory; trust determinants, consequences and evolutionary processes and cycles. This book is devoted to the dynamic development of retailing. The focus is on various strategy concepts adopted by retailing companies and their implementation in practice. This is not a traditional textbook or collection of case studies; it aims to demonstrate the complex and manifold questions of retail management in the form of twenty lessons, where each lesson provides a thematic overview of key issues and illustrates them via a comprehensive case study. The examples are all internationally known retail companies, to facilitate an understanding of what is involved in strategic retail management and illustrate best practices. In the third edition, all chapters were revised and updated. Two new chapters were added to treat topics like corporate social responsibility as well as marketing communication. All case studies were replaced by new ones to reflect the most recent developments. Well-known retail companies from different countries, like Tesco, Zalando, Hugo Boss, Carrefour, Amazon, Otto Group, are now used to illustrate particular aspects of retail management.

Travels in Paradox - Claudio Minca 2006-03-30

This innovative volume focuses on tourism through the twin lenses of cultural theory and cultural geography. Presenting a set of innovative case studies on tourist places around the world, the contributors explore the paradoxes of the tourist experience and the implications of these paradoxes for our broader understanding of modern identity as simultaneously grounded and mobile. The book examines how tourism

reveals the paradoxical ways that places are both mobile and rooted, real and fake, inhabited by those who are simultaneously insiders and outsiders, and both subjectively experienced and objectively viewed. This rich blend of empirical and theoretical analysis will be invaluable for cultural geographers, anthropologists, and sociologists of tourism.
