Georges Seurat - Michelle Foa 2015-07-14

This revelatory study of Georges Seurat (1859-1891) explores the artist's profound interest in theories of visual perception and analyzes how they influenced his celebrated seascape, urban, and suburban scenes. While Seurat is known for his innovative use of color theory to develop his pointillist technique, this

book is the first to underscore the centrality of diverse ideas about vision to his seascapes, figural paintings, and drawings. Michelle Foa highlights the importance of the scientist Hermann von Helmholtz, whose work on the physiology of vision directly shaped the artist's approach. Foa contends that Seurat's body of work constitutes a far-reaching investigation into various modes of visual engagement with the world and into the different states of mind that visual experiences can produce. Foa's analysis also brings to light Seurat's sustained exploration of long-standing and new forms of illusionism in art. Beautifully illustrated with more than 140 paintings and drawings, this book serves as an essential reference on Seurat.

The Apple Watch looks pretty snazzy, right? People have told you all about the cool features: like if you fall it will automatically call for help! They've told you about how you can send a text from your wrist. How you can even make a phone call. That's all great. But how do you actually use it?! As amazing as all the new features are, it's not quite as easy to use as an iPhone; the lack of buttons, the smaller screen, and general UI can make a frustrating initial experience. It looks nothing like the iPhone or iPad interface you are used to--except for a

handful of icons. If you are lost and don't have a lot of time to comb through thousands of pages of tech-speak just to learn how to use a watch, then this book is for you! This book is based on the book "The Ridiculously Simple Guide to Apple Watch Series 5" but includes sections specifically for seniors (including accessibility features that make text easier to see). Are you ready to start enjoying your new Apple Watch? Then let's get started!
