Ventilazione meccanica non invasiva - Stefano Nava 2010-02-13

La crescita esponenziale dell'interesse per la ventilazione non invasiva (NIV) verificatasi negli ultimi 10-15 anni, non solo dal punto di vista clinico e applicativo, ma anche speculativo, ha pochi eguali nella recente storia della medicina. In Italia e in Europa in generale tale metodica è applicata su larga scala, prevalentemente nei reparti di Pneumologia e nelle Unità di Cure Intermedie Respiratorie, mentre per quanto riguarda la sua applicazione nei reparti di Terapia Intensiva Generale (UTI) i dati emersi da uno studio multicentrico condotto nei paesi francofoni vedono la NIV impiegata in una quantità di casi che rappresenta fino al 50% dei pazienti che richiedono assistenza ventilatoria. Il recente studio EUROVENT ha inoltre dimostrato come la NIV non si limiti alla sua applicazione "acuta", dal momento che circa 25.000 pazienti sono attualmente ventilati "in cronico" a domicilio. Inoltre, si calcola che milioni di cittadini europei soffrano attualmente di disturbi respiratori durante il sonno, e per molti di essi il trattamento medico di prima scelta è rappresentato dalla NIV. Questo libro si propone lo scopo di richiamare l'attenzione sulle più recenti acquisizioni in questo campo, con la speranza di fornire uno strumento valido e maneggevole per la scelta e l'impostazione della migliore modalità di ventilazione.

Infusion Nursing - E-Book - Infusion Nurses Society 2011-05-13

With a new focus on evidence-based practice, the 3rd edition of this authoritative reference covers every aspect of infusion therapy and can be applied to any clinical setting. Completely updated content brings you the latest advances in equipment, technology, best practices, guidelines, and patient safety. Other key topics include quality management, ethical and legal issues, patient education, and financial considerations. Ideal as a practical clinical reference, this essential guide is also a perfect review tool for the CRNI examination. Authored by the Infusion Nurses Society, this highly respected reference sets the standard for infusion nursing practice. Coverage of all 9 core areas of INS certification makes this a valuable review resource for the examination. Material progresses from basic to advanced to help new practitioners build a solid foundation of knowledge before moving on to more advanced topics. Each chapter focuses on a single topic and can serve as a stand-alone reference for busy nursing professionals. Expanded coverage of infusion therapy equipment, product selection, and evaluation help you provide safe, effective care. A separate chapter on infusion therapy across the continuum offers valuable guidance for treating patients with infusion therapy needs in outpatient, long-term, and home-care, as well as hospice and ambulatory care centers. Extensive information on specialties addresses key areas such as oncology, pain management,

blood components, and parenteral nutrition. An evidence-based approach and new Focus on Evidence boxes throughout the book emphasize the importance of research in achieving the best possible patient outcomes. The user-friendly design highlights essential information in handy boxes, tables, and lists for quick access. Completely updated coverage ensures you are using the most current infusion therapy guidelines available.

Cognitive Psychotherapy Toward a New Millennium - Tullio Scrimali
2012-02-02

In the roughly two decades since Aaron T. Beck published the now classic "Cognitive Therapy of Depression," and Michael J. Mahoney declared the "Cognitive Revolution," much has happened. What was proposed as the "cognitive revolution" has now become the zeitgeist, and Cognitive Therapy (CT) has grown exponentially with each passing year. A treatment model that was once seen as different, strange, or even alien, is now commonplace. In fact, many people have allied themselves with CT claiming that they have always done CT. Even my psychoanalytic colleagues have claimed that they often use CT. "After all," they say, "Psychoanalysis is a cognitive therapy." Cognitive Therapy (or Cognitive Psychotherapy) has become a kaleidoscope model of treatment, with influences coming from many sources. Some of these contributory streams have been information processing, behavior therapy, Constructivist psychology, and dynamic psychotherapy. Each of these sources have added color, shading, and depth to the CT model. What was originally uni dimensional in terms of the CT focus on depression has become multidimensional as the CT model has been applied to virtually every patient population, treatment setting, and therapy context. CT must now be seen as a general model of psychotherapy that, with modifications, can be applied to the broad range of clinical problems and syndromes. What has tied these various applications of CT together is the emphasis on a strong grounding in cognitive theory, a commitment to empirical support, and a dedication to broadening the model.

International Education in Practice - Mary Hayden 2003-12-16

Edited by three leading figures in the field, this book offers an absolutely authoritative interpretation of international education today. Under the

umbrella of groups such as the International Baccalaureate Organization, academic research, increasing student numbers and interest from national school systems, international schools are rapidly developing in terms of curriculum, standards and influence. This book brings together present thinking on all aspects of international education, its management and the best practices. Truly international in scope, this is a book that anyone involved with international education should read.

Clinical Cases in Psychiatry - Paolo Brambilla 2019

This case series book offers a practical and accessible approach to psychiatry, addressing major clinical problems ranging from psychosis to aging effects, each of which is tackled as it arises in everyday settings. With its emphasis on everyday practice strongly linked to underlying theory, the book combines clinical knowledge with the realities of managing clinical problems, and will provide a basis for developing sound analytical and confident decision-making skills. Presenting different visions of clinical psychiatry and expanding psychiatrists' interventions by integrating innovative neuroscience approaches such as neuroimaging, neuropsychology, TMS and cognitive rehabilitation, it will help clinicians and students alike gain a sound understanding of the wide range of signs and symptoms that indicate psychiatric disorders, and how the diagnosis, management and treatment options can differ from those in other medical specialties. The volume includes learning activities, with questions on each clinical case followed by detailed explanatory answers, and self-assessment exercises to assist with learning and revision. Throughout the book, tips and key features are highlighted with boxes, algorithms, tables and figures, which the reader can refer back to for exam revision and well into her/his career.

Mind and Places - Anna Anzani 2020-05-12

This book explores the contributions of psychological, neuroscientific and philosophical perspectives to the design of contemporary cities. Pursuing an innovative and multidisciplinary approach, it addresses the need to re-launch knowledge and creativity as major cultural and institutional bases of human communities. Dwelling is a form of knowledge and re-invention of reality that involves both the tangible dimension of physical places and their mental representation. Findings in the neuroscientific field are increasingly opening stimulating perspectives on the design of spaces, and highlight how our ability to understand other people is strongly related to our corporeity. The first part of the book focuses on the contributions of various disciplines that deal with the spatial dimension, and explores the dovetailing roles that science and art can play from a multidisciplinary perspective. In turn, the second part formulates proposals on how to promote greater integration between the aesthetic and cultural dimension in spatial design. Given its scope, the book will benefit all scholars, academics and practitioners who are involved in the process of planning, designing and building places, and will foster an international exchange of research, case studies, and theoretical reflections to confront the challenges of designing conscious places and enable the development of communities.

[An Anthropology of Biomedicine](#) - Margaret Lock 2011-09-09

An Anthropology of Biomedicine is an exciting new introduction to biomedicine and its global implications. Focusing on the ways in which the application of biomedical technologies bring about radical changes to societies at large, cultural anthropologist Margaret Lock and her co-author physician and medical anthropologist Vinh-Kim Nguyen develop and integrate the thesis that the human body in health and illness is the elusive product of nature and culture that refuses to be pinned down.

Introduces biomedicine from an anthropological perspective, exploring the entanglement of material bodies with history, environment, culture, and politics Develops and integrates an original theory: that the human body in health and illness is not an ontological given but a moveable, malleable entity Makes extensive use of historical and contemporary ethnographic materials around the globe to illustrate the importance of this methodological approach Integrates key new research data with more classical material, covering the management of epidemics, famines, fertility and birth, by military doctors from colonial times on Uses numerous case studies to illustrate concepts such as the global commodification of human bodies and body parts, modern forms of population, and the extension of biomedical technologies into domestic and intimate domains Winner of the 2010 Prose Award for Archaeology and Anthropology

Haemoglobinopathy Diagnosis - Barbara J. Bain 2020-02-28

An updated, essential guide for the laboratory diagnosis of haemoglobin disorders This revised and updated third edition of Haemoglobinopathy Diagnosis offers a comprehensive review of the practical information needed for an understanding of the laboratory diagnosis of haemoglobin disorders. Written in a concise and approachable format, the book includes an overview of clinical and laboratory features of these disorders. The author focuses on the selection, performance, and interpretation of the tests that are offered by the majority of diagnostic laboratories. The book also explains when more specialist tests are required and explores what specialist referral centres will accomplish. The information on diagnosis is set in a clinical context. The third edition is written by a leading haematologist with a reputation for educational excellence. Designed as a practical resource, the book is filled with illustrative examples and helpful questions that can aide in the retention

of the material presented. Additionally, the author includes information on the most recent advances in the field. This important text: • Contains a practical, highly illustrated, approach to the laboratory diagnosis of haemoglobin disorders • Includes "test-yourself" questions and provides an indispensable tool for learning and teaching • Presents new material on antenatal screening/prenatal diagnostic services • Offers myriad self-assessment case studies that are ideal for the trainee Written for trainees and residents in haematology, practicing haematologists, and laboratory scientists, Haemoglobinopathy Diagnosis is an essential reference and learning tool that provides a clear basis for understanding the diagnosis of haemoglobin disorders.

Neuropsychology of Communication - Michela Balconi 2010-09-08

In this volume, the communicative and neuropsychological correlates of daily interactions are discussed. The predominant account on explaining the construction of meaning by humans is the inter-relational perspective, that postulates an intentional convergence of meaning arising as a consequence of the active exchanges between people. The neural correlates of communication were illustrated in the light of new empirical results, considering the main topics of: a) language and language development; b) pragmatics and neuropragmatics of communication; c) neurocognition and the cognitive bases of intentions; d) nonverbal communication and emotion contribution to the communicative systems. New methodological approaches are considered, with particular attention to neuroimaging (such as PET and fMRI) and brain stimulation techniques (as MEG and TMS), as well as their application to the clinical field.

On Tyranny - Leo Strauss 1991

On Tyranny is Leo Strauss's classic reading of Xenophon's dialogue, *Hiero or Tyrannicus*, in which the tyrant Hiero and the poet Simonides discuss the advantages and disadvantages of exercising tyranny. This edition includes a translation of the dialogue, a critique of the commentary by the French philosopher Alexandre Kojève, Strauss's restatement of his position in light of Kojève's comments, and finally, the complete Strauss-Kojève correspondence. "Through [Strauss's]

interpretation Xenophon appears to us as no longer the somewhat dull and flat author we know, but as a brilliant and subtle writer, an original and profound thinker. What is more, in interpreting this forgotten dialogue, Strauss lays bare great moral and political problems that are still ours." —Alexandre Kojève, *Critique "On Tyranny is a complex and stimulating book with its 'parallel dialogue' made all the more striking since both participants take such unusual, highly provocative positions, and so force readers to face substantial problems in what are often wholly unfamiliar, even shocking ways."* —Robert Pippin, *History and Theory* "Every political scientist who tries to disentangle himself from the contemporary confusion over the problems of tyranny will be much indebted to this study and inevitably use it as a starting point."—Eric Voegelin, *The Review of Politics* Leo Strauss (1899-1973) was the Robert Maynard Hutchins Distinguished Service Professor of Political Science at the University of Chicago.

Sustainable Development Report 2021 - Jeffrey Sachs 2021-10-14

The Sustainable Development Report 2021 features the SDG Index and Dashboards, the first and widely used tool to assess country performance on the UN Agenda 2030 and the Sustainable Development Goals. The report analyses and outlines what needs to happen for the Decade of Action and Delivery of the SDGs. In order to build back better following the Covid-19 pandemic, especially low-income countries will need increased fiscal space. The report frames the implementation of the SDGs in terms of six broad transformations. The authors examine country performance on the SDGs for 193 countries using a wide array of indicators, and calculate future trajectories, presenting a number of best practices to achieve the historic Agenda 2030. The views expressed in this report do not reflect the views of any organizations, agency or programme of the United Nations. This title is available as Open Access on Cambridge Core.

The Place - Gary Douglas 2013-02

As Jake Rayne travels through Idaho in his classic '57 Thunderbird, a devastating accident is the catalyst for a journey he isn't expecting. Alone in the deep forest, with his body battered and broken, Jake calls

out for help. And the help he finds changes not only his life but his whole reality. Jake is opened up to awareness' of possibilities. Possibilities that we have always known should be, but have not shown up. Are you willing to have a world where language is not a barrier and people communicate telepathically, where the ability to heal and nurture one another is not limited to the qualified few? What people say... "This novel is so well written that it transported me to "The Place" and made me wish I was one of the characters and wonder how this world could be if that kind of stuff was possible?" --Claudia This book gives a very different perspective on life and the possibilities presented. In a way i have been dreaming of this place, but I had no idea that someone else would have the same vision, so maybe this 'place' actually exists? That would be a dream come true beyond my wildest imagination! A great read that made me desire to read it again and again, and every time I did, there would be more things I would become aware of, that were hiding in the depth of the wonderful language presented in this book." --Suzy

The Wiley-Blackwell Handbook of Group Psychotherapy - Jeffrey L. Kleinberg 2015-06-22

Group Psychotherapy "Finally, we have a book about group therapy that answers the question, 'Is there one book that covers the waterfront but is deep enough to provide more than just an overview of models, and can actually help me become a better group therapist?' This is such a book." International Journal of Group Psychotherapy "This volume reflects the expansion in the field of psychodynamic group psychotherapy that today incorporates a variety of theoretical perspectives. Leading experts from various countries provide the reader with a clear overview of the different approaches. In addition, there are chapters in this volume that deal with special populations and conditions of treatment. While providing a straightforward introduction to the plethora of material in the field, the volume will also serve as a comprehensive resource for any seasoned group psychotherapist." Howard D. Kibel, Professor of Psychiatry, New York Medical College and past President of the American Group Psychotherapy Association, USA The Handbook of Group Psychotherapy is a user-friendly guide to conducting group

psychotherapy in various settings and with different populations. It has been designed as a resource for new professionals, including graduate students in mental health, as well as more seasoned clinicians planning to integrate group psychotherapy into their work. Bringing together pre-eminent group psychotherapists from different theoretical perspectives and countries, the articles in this volume present their approaches to conducting groups with diverse populations in different settings. Written in straight-forward, jargon-free language, the articles directly speak to the needs of the mental health professional planning to begin a group or to strengthen an existing group. Whether combined with a formal class in group techniques, human relations, or group dynamics, or in an institute training group practitioners, or read as part of one's own professional development, this work is likely to advance the reader's clinical competency and strengthen their self-confidence as a leader. Using a personal style and speaking from years of experience, the contributors provide hands-on suggestions as to how a group leader really works. From determining patient or client needs, developing treatment goals, and constructing a group, to handling emergencies, the contributors address the needs of the new group leader. The articles also address issues of diversity and globalism, as well as trauma and resiliency, making this a truly post-9/11 contribution.

Asylums - Erving Goffman 2017-09-08

A total institution is defined by Goffman as a place of residence and work where a large number of like-situated, individuals, cut off from the wider

society for an appreciable period of time, together lead an enclosed, formally administered round of life. Prisons serve as a clear example, providing we appreciate that what is prison-like about prisons is found in institutions whose members have broken no laws. This volume deals with total institutions in general and, mental hospitals, in particular. The main focus is, on the world of the inmate, not the world of the staff. A chief concern is to develop a sociological version of the structure of the self. Each of the essays in this book were intended to focus on the same issue- the inmate's situation in an institutional context. Each chapter approaches the central issue from a different vantage point, each introduction drawing upon a different source in sociology and having little direct relation to the other chapters. This method of presenting material may be irksome, but it allows the reader to pursue the main theme of each paper analytically and comparatively past the point that would be allowable in chapters of an integrated book. If sociological concepts are to be treated with affection, each must be traced back to where it best applies, followed from there wherever it seems to lead, and pressed to disclose the rest of its family.

Constraint-induced Movement Therapy - G. Uswatte 2006

Constraint-Induced Movement therapy (CI therapy) is a behavioral approach to neurorehabilitation based on a program of neuroscience experiments conducted with monkeys. Evidence has accumulated to support the efficacy of CI therapy for rehabilitating hemiparetic arm use in individuals with chronic stroke. This book addresses the related topics.

Real-World Decision Support Systems - Jason Papathanasiou
2016-12-19

This book presents real-world decision support systems, i.e., systems that have been running for some time and as such have been tested in real environments and complex situations; the cases are from various application domains and highlight the best practices in each stage of the system's life cycle, from the initial requirements analysis and design phases to the final stages of the project. Each chapter provides decision-makers with recommendations and insights into lessons learned so that failures can be avoided and successes repeated. For this reason unsuccessful cases, which at some point of their life cycle were deemed as failures for one reason or another, are also included. All decision support systems are presented in a constructive, coherent and deductive manner to enhance the learning effect. It complements the many works that focus on theoretical aspects or individual module design and development by offering 'good' and 'bad' practices when developing and using decision support systems. Combining high-quality research with real-world implementations, it is of interest to researchers and professionals in industry alike.

Asylums. Essays on the Social Situation of Mental Patients and Other Inmates - Erving Goffman 1971

Healing Invisible Wounds - Richard F. Mollica 2008-12-29

In these personal reflections on his thirty years of clinical work with victims of genocide, torture, and abuse in the United States, Cambodia, Bosnia, and other parts of the world, Richard Mollica describes the surprising capacity of traumatized people to heal themselves. Here is

how Neil Boothby, Director of the Program on Forced Migration and Health at the Mailman School of Public Health, Columbia University, describes the book: "Mollica provides a wealth of ethnographic and clinical evidence that suggests the human capacity to heal is innate--that the 'survival instinct' extends beyond the physical to include the psychological as well. He enables us to see how recovery from 'traumatic life events' needs to be viewed primarily as a 'mystery' to be listened to and explored, rather than solely as a 'problem' to be identified and solved. Healing involves a quest for meaning--with all of its emotional, cultural, religious, spiritual and existential attendants--even when biochemical reactions are also operative." Healing Invisible Wounds reveals how trauma survivors, through the telling of their stories, teach all of us how to deal with the tragic events of everyday life. Mollica's important discovery that humiliation--an instrument of violence that also leads to anger and despair--can be transformed through his therapeutic project into solace and redemption is a remarkable new contribution to survivors and clinicians. This book reveals how in every society we have to move away from viewing trauma survivors as "broken people" and "outcasts" to seeing them as courageous people actively contributing to larger social goals. When violence occurs, there is damage not only to individuals but to entire societies, and to the world. Through the journey of self-healing that survivors make, they enable the rest of us not only as individuals but as entire communities to recover from injury in a violent world.

International Perspectives on Spinal Cord Injury - World Health Organization 2013

"Every year between 250 000 and 500 000 people suffer a spinal cord injury, with road traffic crashes, falls and violence as the three leading causes. People with spinal cord injury are two to five times more likely to die prematurely. They also have lower rates of school enrollment and economic participation than people without such injuries. Spinal cord injury has costly consequences for the individual and society, but it is preventable, survivable and need not preclude good health and social inclusion. Ensuring an adequate medical and rehabilitation response, followed by supportive services and accessible environments, can help

minimize the disruption to people with spinal cord injury and their families. The aims of International perspectives on spinal cord injury are to: ---assemble and summarize information on spinal cord injury, in particular the epidemiology, services, interventions and policies that are relevant, together with the lived experience of people with spinal cord injury; ---make recommendations for actions based on this evidence that are consistent with the aspirations for people with disabilities as expressed in the Convention on the Rights of Persons with Disabilities. *Biofeedback* - John V. Basmajian 1983

Relational Social Work - Fabio Folgheraiter 2004

In this innovative book Fabio Folgheraiter presents a systematic introduction to networking and reflexive practice in social work. The text explores how the interested parties in social care can acquire a shared power in care planning and decision making and that when this networking occurs, the efficacy of caring initiatives increases.

Tunnel Syndromes - Marko M. Pecina 1997

The Second Edition follows up on the interest generated by the successful first edition with more syndromes, more illustrations, updated references, and new chapters. The purpose of the book remains the same-to provide a quick overview of the definition, anatomy, etiology, clinical symptoms and signs, and treatment of tunnel syndromes. The new edition continues to probe the origins of these painful syndromes and to propose the possible causes that lead to them. The Overview section introduces the significance of tunnel syndromes and offers a new chapter devoted to the neurophysiology and electrodiagnosis of compression syndromes. It includes information on basic electromyography analysis, nerve conduction velocity testing, problems with electromyography interpretation, and the clinical use of electrodiagnostic tests. Part I presents tunnel syndromes of the upper extremities, Part II is devoted to the trunk, and Part III discusses the lower extremities. The final section addresses how particular tunnel syndromes affect athletes. For each syndrome, the etiology, clinical symptoms and signs, and treatment are examined in detail. Orthopedists,

neurosurgeons, neurologists, sports medicine specialists, occupational and physical therapists, and medical doctors and students will all find the Second Edition of Tunnel Syndromes to be an essential update for their reference libraries.

Cognitive Therapy of Eating Disorders on Control and Worry - Sandra Sassaroli 2011

The aim of this book is to illustrate a variant of the standard cognitive treatment for eating disorders. This therapy is based on the principle that assessing and treating the patient's process of worry and sense of control fosters greater understanding of the psychopathology of the eating disorder and increases the efficacy of cognitive treatment. The book is an edited collection of chapters that discuss the psychopathological roles played by control and worry in eating disorders, and provide a detailed description of the therapeutic protocol, which primarily focuses on the treatment of the cognitive factors of control and worry as core factor of a psychotherapy of eating disorders. In addition, the book shows contributions from other theorists in the field who have investigated the role of worry, preoccupation, and control, or who explore the connections between worry, control, and other emotional factors underlying eating disorders, such as perfectionism, self-esteem, and impulsivity.

A Textured Life - Alison Pedlar 1999-04-16

Based on an extensive Canadian survey of support services for adults with developmental disabilities, and 141 interviews with such adults, their families, and support staff, this book discusses the empowerment through community which developmentally disabled people can experience in today's post-deinstitutionalized society. The Canadian origins of the work do not prevent it from being relevant to professionals working with these populations in the United States and elsewhere. The Boder Test of Reading-spelling Patterns - Elena Boder 1982

Oxygen-Ozone Therapy - V. Bocci 2013-06-29

When I was about fifteen, my Biological Sciences teacher, Prof. N.

Benacchio, lent me a book by Paul de Kruif "The Microbe Hunters" and I remained fascinated by infectious diseases. I was intrigued by the potency of virulent bacteria which are constantly trying to invade our bodies and often overcome what today we call innate and adoptive immunity. Indeed, shortly after that, I was struck by his tragic death due to peritonitis. Later, while studying medicine (although medical knowledge in the 1950s was almost primordial compared with today), I soon realised how the various biological systems were wonderfully organised but at the same time frail and how our life could end in a few minutes. Slowly it became obvious that our "wellness" was the result of a dynamic and very unstable equilibrium between health and disease. This unstable equilibrium could be broken forever if the body's response could not reverse the pathological state. I stuck a sort of poster on the wall of my room with these three words and connecting arrows: HEALTH~? DISEASE -? DEATH As I don't believe in another world after death, it became obvious to me that we should make every possible effort not only to delay death, but to try always to shift the equilibrium to the left. In this book, I will try to show that this can be achieved, as a last resort, even with ozonotherapy.

Pragmatic Psychology - Susanna Mittermaier 2015-05-20

Practical Tools For Being Crazy Happy. Everyone has at least one 'crazy' person in their life, right (even if it's ourselves!)? And there are a lot of labels and diagnoses out there - depression, anxiety, ADD, ADHD, bipolar, schizophrenia...What if there was a different possibility with mental illness - and what if change and happiness were a totally available reality? Susanna is a clinical psychologist with an amazing capacity to facilitate what this reality often defines as crazy from a totally different point of view - one of possibility and ease. What if everything is the opposite of what it appears to be? What if you could employ and enjoy your insanity (and that of the people around you?) and create more ease for you and others - if you had the tools to change this reality's point of view about mental illness, would you use them?

Salon Des Femmes - Gary M. Douglas 2014-09

What if you lived in a world where everybody was kind to each other? What if you were the one who could assist in creating that? What if you had a relationship that was loving, caring, and receiving--and not unaware, not hating, and not judging? Gary Douglas is on a mission to end the perpetual conflict between men and women. Salon des Femmes is based on a series of teleclasses Douglas held with a group of women. They discussed men, sex, relationships, men's and women's roles, and creating amazing, harmonious relationships. It blends the ground-breaking Access Consciousness® tools and processes, insightful revelations and heart-warming inspiration. Says Douglas: "My desire is to give women in the world a greater sense of peace with others and peace with self and the place where they wouldn't feel like they have to fight for everything they are getting." Douglas encourages women to become "pragmatists of femininity," applying their feminine power to create what they want. A "pragmatic relationship" is where partners strive to make things work for everyone involved, he says. "Happily ever after doesn't occur unless you are willing to become pragmatic about your choices." "Salon des Femmes is a profound book. If it's read with care, it will change women's lives in really big ways."

Le tre costituzioni pacifiste - Mario G. Losano 2020

The United Nations world water development report 2020 - UNESCO World Water Assessment Programme 2020-03-23

The 2020 edition of the WWDR, titled 'Water and Climate Change' illustrates the critical linkages between water and climate change in the context of the broader sustainable development agenda. Supported by examples from across the world, it describes both the challenges and opportunities created by climate change, and provides potential

responses - in terms of adaptation, mitigation and improved resilience - that can be undertaken by enhancing water resources management, attenuating water-related risks, and improving access to water supply and sanitation services for all in a sustainable manner. It addresses the interrelations between water, people, environment and economics in a changing climate, demonstrating how climate change can be a positive catalyst for improved water management, governance and financing to achieve a sustainable and prosperous world for all. The report provides a fact-based, water-focused contribution to the knowledge base on climate change. It is complementary to existing scientific assessments and designed to support international political frameworks, with the goals of helping the water community tackle the challenges of climate change, and informing the climate change community about the opportunities that improved water management offers in terms of adaptation and mitigation.

An Orchid Shining in the Hand - Lorenzo Calogero 2015

Poetry. Translated from the Italian by John Taylor. Bilingual Edition. The first comprehensive translation of a long-neglected poet who lived most of his life in his home village in Calabria, experimented with new forms of expression and produced a body of work radiant with twilight mystery,

scintillating perception and philosophical breadth. After his obscure and possibly self-inflicted death, Calogero (1910-1961) was gradually discovered, appreciated and published in prestigious editions. John Taylor's dedicated translation deftly handles the semantic leaps and disjunctions in these subtle but boldly original poems, and his introduction, informed by his visit to the village of Melicuccà and his association with the poet's relatives, offers the perfect guide into a private and renewed world. "Calogero felt the silence that had befallen him (or that he had sought?) as a disaster, as the sum of his misfortunes: he listened to it, analyzed it, wholly filled it with a dense web of meanings and subliminal thoughts at the very limits of vertigo..."—Mario Luzi "[His] authentic and noble message is that of a despair by now so elevated and calm that it retains no traces of romantic sorrow, or existential dismay or anxiety."—Giorgio Caproni "The most surprising gift of this ancient-modern poet is the wealth of violent, risk-taking metaphors. Sometimes he seemingly experiments in the surrealist sense of the term; those techniques he has mastered and surpassed, and his experimentation involves varied, more intricate, and conscious techniques."—Amelia Rosselli
La Giusta Riabilitazione Per Te - Right Recovery for You (Italian) - Marilyn M. Bradford 2016-10

Finché funzionerai da quello che ti è stato detto siano le dipendenze (e da tutti i miti e le bugie che l'accompagnano) non sarai mai in grado di scegliere al di là di esse. Se sei disposto a considerare un approccio completamente differente alla dipendenza, questo libro fa per te. La Giusta Riabilitazione Per Te non ti offre un sistema al quale adeguarti. Quello che offre sono strumenti, tecniche, informazioni e processi che puoi usare per ripulire i tuoi problemi con la dipendenza e per creare una vita che va oltre qualsiasi comportamento dipendente o compulsivo. Questa è la tua scelta. Potrebbe spaventarti un po' all'inizio, ma con coraggio e determinazione potrai andare oltre il comportamento dipendente che pensavi ti avrebbe posseduto per il resto della vita. Marilyn Bradford, MSSW, MEd., CFMW, è una speaker internazionale, psicoterapeuta e insegnante che ha lavorato nel campo della dipendenza per oltre vent'anni. È la direttrice di Giusta Riabilitazione Per Te, un approccio unico nel suo genere e radicale per porre fine a qualsiasi comportamento dipendente o compulsivo. Sono state le sue stesse dipendenze da alcol, cibo e erroneità di sé, e la sua indisponibilità ad accettare la dipendenza come una sentenza a vita che l'hanno portata a creare questo programma così trasformativo e diverso. Ora Marilyn viaggia per il mondo offrendo alle persone la possibilità di liberarsi davvero dalle dipendenze.
