The FRBR Family of Conceptual Models - Richard P. Smiraglia
2014-10-29

Since 1998 when FRBR (Functional Requirements for Bibliographic Records) was first published by IFLA, the effort to develop and apply FRBR has been extended in many innovative and experimental directions. Papers in this volume explain and expand upon the extended family of FRBR models including Functional Requirements for Authority Data (FRAD), Functional Requirements for Subject Authority Data (FRSAD), and the object-oriented version of FRBR known as FRBRoo. Readers will learn about dialogues between the FRBR Family and other modeling technologies, specific implementations and extensions of FRBR in retrieval systems, catalog codes employing FRBR, a wide variety of research that uses the FRBR model, and approaches to using FRBR for the Semantic Web. Librarians of all stripes as well as library and information science students and researchers can use this volume to bring their knowledge of the FRBR model and its implementation up to date. This book was published as a special issue of *Cataloging & Classification Quarterly*.

Discourse and Dominion in the Fourteenth Century - Jesse M. Gellrich

1995-03-06

This wide-ranging study of language and cultural change in fourteenth-century England argues that the influence of oral tradition is much more important to the advance of literacy than previously supposed. In contrast to the view of orality and literacy as opposing forces, the book maintains that the power of language consists in displacement, the capacity of one channel of language to take the place of the other, to make the source disappear into the copy. Appreciating the interplay between oral and written language makes possible for the first time a way of understanding the high literate achievements of this century in relation to momentous developments in social and political life. Part I reassesses the "nominalism" of Ockham and the "realism" of Wyclif through discussions of their major treatises on language and government. Part II argues that the chronicle histories of this century are tied specifically to oral customs, and Part III shows how Sir Gawain and the Green Knight and Chaucer's *Knight's Tale* confront outright the displacement of language and dominion. Informed by recent discussions in critical theory, philosophy, and anthropology, the book offers a new synoptic view of fourteenth-century culture. As a critique of the social context of medieval literacy, it speaks directly to postmodern debate about the politics of historicism today.

Johannis Flenderi ... Phosphorus philosophicus novissimus, seu

Logica contracta Claubergiana illustrata locupletissimo commentario logico-metaphysico ... Editio quarta, planè nova ... auctior ... novis accessionibus ... ipsius Autoris manu additis, & simul ampliore vocum & rerum indice, ceu brevi lexico logico-metaphysico, etc. [With the text of the "Logica contracta" of Johann Clauberg.] - Joannes FLENDERUS 1731

Law and Wisdom in the Bible - David Daube 2011-05-01

"That over forty years after they were delivered these famous but unavailable Gifford Lectures should be published is occasion for celebration. Once again we hear Daube's voice, patient and probing, as he turns over, tests, pushes fresh inquiries, and finds new insights. No man has had such a subtle sense of scriptural texts matched by such a supple sense of the practices and peculiarities of human beings engaged in the legal process. Law and Wisdom in the Bible is classic Daube."
— John T. Noonan Jr., United States Circuit Judge David Daube (1909-99) was known for his unique and sophisticated research on Roman law, biblical law, Jewish Law, and medical ethics. In Law and Wisdom in the Bible, the first published collection of his 1964 Gifford Lectures, Daube derives from his complex understanding of biblical texts both ancient and contemporary notions about wisdom, justice, and education. In addressing these and other profound issues, Daube crosses traditional disciplinary boundaries and bridges the gap between humanism and religion, especially with regard to Christianity and Judaism. With his sophisticated understanding of Talmudic law and literature, his thinking, which is on full display in these lectures, revolutionized prevailing perceptions about the New Testament.

One Hundred Years of Russell's Paradox - Godehard Link 2004-01-01

Die in diesem Band zusammengefassten Beiträge stellen die wesentlichen Forschungsergebnisse der internationalen Münchner Konferenz "100 Jahre Russell-Paradoxon" im Jahr 2001 dar, auf der an die Entdeckung des berühmten Russell Paradoxons vor 100 Jahren erinnert wurde. Die 31 Beiträge und der Einführungssessay des Herausgebers wurden alle - bis auf zwei Ausnahmen - ursprünglich für

diesen Band verfasst.

Ἐρημνεῖα λογικὰ ... Editio nova accurata, etc - Adrianus HEEREBOORD 1663

Thesaurus Philosophorum seu distinctiones et axiomata philosophica a G. Reeb ... proposita a J. N. Cornoldi ... recognita et aucta - Georgius REEB 1875

Polish Philosophers of Science and Nature in the 20th Century - 2022-07-25

The volume is a collection of essays about prominent Polish 20th century philosophers of science and scientists who were concerned with problems in the philosophy of science. The contribution made by Polish logicians, especially those from the Lvov-Warsaw School, like Łukasiewicz, Kotarbiński, Czeżowski or Ajdukiewicz, is already well known. One of the aims of the volume is to offer a broader perspective. The papers collected here are devoted to the work of such philosophers as Zawirski, Metallmann, Dąmbska, Mehlberg, Szaniawski and Giedymin as well as to the work of such scientists as Smoluchowski, Fleck, Infeld and Chyliński. The introduction to the volume, written by the editor and Jacek Jadacki, presents an overview of the history of the Polish philosophy of science from the foundation of the Cracow Academy (in 1364) to the present.

The History of Scepticism : From Savonarola to Bayle - St. Louis (Emeritus) Richard H. Popkin Professor of Philosophy Washington University 2003-02-21

This is the third edition of a classic book first published in 1960, which has sold thousands of copies in two paperback edition and has been translated into several foreign languages. Popkin's work has generated innumerable citations, and remains a valuable stimulus to current historical research. In this updated version, he has revised and expanded throughout, and has added three new chapters, one on Savonarola, one on Henry More and Ralph Cudworth, and one on Pascal. This authoritative treatment of the theme of scepticism and its historical

impact will appeal to scholars and students of early modern history now as much as ever.

1859

Logic and Philosophy in the Lvov—Warsaw School - Jan Wolenski
2012-12-06

The Lvov-Warsaw School was active in all spheres of philosophy. Its members worked in the border area between philosophy and disciplines such as psychology, linguistics, and literary theory. But its most important achievements were without doubt in logic and philosophical analysis based on logic. The present book is concerned with fields to which the Lvov-Warsaw School made its most important and famous contributions. Data on the School as a whole are included only in the first and last part of the book. This work is based on my monograph (1985), which appeared in Polish. But it is not merely a translation, because some fragments of the Polish version have been omitted (e. g., the chapter on ethics), and some have been revised. Many persons helped me in my work on the book in Polish as well as on the present edition. I must first mention the late Izydora Dąmbska, to whom this book is dedicated. On various detailed issues I have availed myself of advice and information given to me by Stefan Amsterdamski, Zdzisław Augustynek, Kazimierz Czarnota, Henryk Hii, Bolesław Iwanus, Jacek Jadacki, Jacek Kabziliński, Stanisław Kiczuk, Tomasz Komendzinski, Janina Kotarbinska, Czesław Lejewski, Jerzy Perzanowski, Marian Przeteciński, the late Jerzy Słupecki, Klemens Szaniawski, Stefan Zamecki, Zbigniew Zwinogrodzki i Jan Zygmunt. I am indebted to Jaakko Hintikka for suggesting that my book be translated into English and published by Reidel. Olgierd Wojtasiewicz helped me to prepare the English text.

Kool Logic - Urayoán Noel 2005

The poems in this collection mix English and Spanish while tracing the 'kool logic' of culture in transit. Scuttling from free verse and limericks to d'cimas and terza rima, the poet is our guide on a transcultural tour through downtowns, suburbs, stockyards, shantytowns, power lunches, HMOs, open mics, and open sores. Fusing pop riffs, Beat whimsy, Nuyorican punch lines, and modernist deadpan, the poet in these pages is also the comedian, the visionary, the 'j'baro, the agitator, the theorist, the lounge singer, the slacker ? Puerto Rican poet and performer Urayo'n Noel has coined a new sort of pop artifact: a logic primer with laugh track, a tainted culture sampler, an urban ready-made of forms and voices designed to confound and delight the enlightened masses.

A. A. V. ... de Re Logica ... libri sex. Editio tertia emendatior - Luiz Antonio VERNEY 1762

English-Spanish Conversational Dictionary with a Spanish-English Vocabulary and a Grammatical Appendix - Richard Jäschke 1911

Spatial Information Theory - Sara Irina Fabrikant 2015-09-29

This book constitutes the proceedings of the 12th International Conference on Spatial Information Theory, COSIT 2015, held in Santa Fee, NM, USA, in October 2015. The 22 papers presented in this book were carefully reviewed and selected from 52 full paper submissions. The following topics are addressed: formalizing and modeling space-time, qualitative spatio-temporal reasoning and representation, language and space, signs, images, maps, and other representations of space, navigations by humans and machines.

Logica della pratica e Pratica della Logica - Dario Cositore

Logic and Implication - Petr Cintula 2022-01-01

This monograph presents a general theory of weakly implicative logics, a family covering a vast number of non-classical logics studied in the literature, concentrating mainly on the abstract study of the relationship between logics and their algebraic semantics. It can also serve as an introduction to (abstract) algebraic logic, both propositional and first-order, with special attention paid to the role of implication, lattice and residuated connectives, and generalized disjunctions. Based on their recent work, the authors develop a powerful uniform framework for the study of non-classical logics. In a self-contained and didactic style, starting from very elementary notions, they build a general theory with a substantial number of abstract results. The theory is then applied to obtain numerous results for prominent families of logics and their algebraic counterparts, in particular for superintuitionistic, modal, substructural, fuzzy, and relevant logics. The book may be of interest to a wide audience, especially students and scholars in the fields of mathematics, philosophy, computer science, or related areas, looking for an introduction to a general theory of non-classical logics and their algebraic semantics.
